Health And Beauty

Strain, tension and fatigue affect different people different ways. Some have indigestion as a result; some irritation of the bladder; some leg ache; some back ache and others headache. Many more are hit at the back of the neck.

It is best to know how you are affected. This knowledge of your physical self will save you a lot of trouble and worry. It may well add years to your life. Many people who are in poor health during middle life live to a vital old age by adopting a daily routine especially suited to them.

Even though you may have generally good health, there are probably several little things about your physical individuality that you would be wise to remember. There are many people with good digestion as a rule, but who know that certain foods will disagree with them. Most people find it almost impossible to digest food eaten in an atmosphere of unhappiness or friction.

You have probably found that if you are in the hot sun for a long time you will develop a headache. It may be that you do not react well to a cold shower, that you get sinus trouble if you swim in fresh water or any number of other things.

It is a wise person who heeds these physical eccentricities. You will be adding comfort to your life and may actually be adding to your life span.

If strain and fatigue hit you at the back of the neck you will find heat and massage helpful. You must learn to relax. These same steps have been known to cure a headache.

Try not to worry about the things in life you can do nothing about.

In Fashion

Cotton clothes for the resorts are being shown and they come in beautiful colors. Stripes are good and the skirts are short.

Patriotic colors are used in many of the new spring clothes and combinations such as pink and green or navy and gold were seen.

A Spanish influence is evident in some of the new styles. Colorful prints, full sleeves and very long pants that flare are some of these signs.

Frills and scallops around the hemline of dresses are good style this spring.

Checks are also popular in colors. Checked cotton suits or suits of some of the newer fabrics are not only smart but sensible for warm weather travel.

Packable garments for travel are in the shops and jersey is one of the favorites.
