## About Your Home

Pictures are that final touch that can make or break room decor. There are people who do not like pictures and the absence of them in their homes make the rooms look cold. Other people buy and hang pictures at random just to use up space.

It's not necessary to spend a fortune on paintings, pictures or etchings to decorate your home. A color photograph cut from a magazine, if framed correctly, will add that needed bit of charm.

There are a few things that should be taken into consideration when planning a picture arrangement:

First, the type of picture chosen should blend with the type of furniture in the room. Also, the colors in the picture should not clash with the color scheme of the room.

After the picture has been chosen-make sure a proper frame is selected and that the picture is cropped and matted correctly.

Remember, the delicate colorings and brush strokes of Oriental prints and the simplicity of etchings and bloc prints should not be overwhelmed by heavy ornate frames. As a general rule, these types of pictures should be widely matted and framed in simple narrow frames.

On the other hand, solid oils are correctly framed by massive, heavy frames. Hang pictures advantageously. A miniature picture, no matter how lovely, is not hung over a sofa where one large picture or a group of six or eight pictures should be placed.

The picture in a home should express the tastes, interest and hobbies of the owners, framed and hung so the effect will be pleasing to the eye.

Smartness is never synonymous with vulgarity and improprieties.
