In presenting the proposal, Mrs. Taylor mentioned that the image of the library has changed. No longer is the library a room equipped with books, but in addition to books, the library should have audio visual materials and equipment. In view of this fact, the P.T.A. not only agreed to install study carrels

in the library but further agreed to purchase a DuKane instrument used in viewing sound filmstrips.

Mr. Burrell announced that a musical program would be presented at the December 18 P.T.A. meeting. He also announced the Adult Education courses.

Health And Beauty

A great deal is written about the best way to weight reduction. If you are interested in this subject, you will want to learn about hidden calories.

—Did you know, that if you would eliminate just one pat of butter each day, you could lose more than eight pounds in body weight in one year. If you would eliminate one tablespoonful of salad oil per day you could reduce ten pounds during one year.

A good example of hidden calories can be found in the "diet popular" baked potato. The potato itself contains only eighty calories. However, by the time you add one pat of butter the calories double and can hardly be called diet fare.

One tablespoon of gravy contains 100 calories. By the time you fry foods, you need an adding machine to count the calories.

Many of us drop an artificial sweetener in our coffee or tea, then fill the cup with cream. A teaspoon full of sugar contains about sixteen calories. The cream can easily add 80 calories.

Lean roastbeef is only twelve per cent fat by weight. Lean pork, on the other hand, is fully thirty per cent fat.

Some people pad their daily intake of calories by drinking. In this department, it is easy to make weight reduction impossible even on a strict diet. There are 150 calories in one and one-half ounces of whisky, 120 calories in the same amount of gin and 120 calories in an eight-ounce glass of beer.

Keep these bits of information in mind if you want to lose weight or retain your present weight.

She (sweetly) -- Oh, no, darling, but sometimes you do sound so plausible.
