

# The Carolina Watchman.

VOL. XV.—THIRD SERIES

SALISBURY, N. C., NOVEMBER 8, 1883.

NO 4

The Carolina Watchman,  
ESTABLISHED IN THE YEAR 1868.  
PRICE, \$1.50 IN ADVANCE.

For Dyspepsia, Costiveness, Sick Headaches, Chronic Bileth, Rheum, Jaundice, Impurity of the Blood, Fever and Ague, Malaria, and all Diseases caused by Derangement of Liver, Bowels and Kidneys.

Persons traveling or living in Unhealthy Localities, by taking a dose occasionally to keep the Liver in healthy action, will avoid all Malaria, Bilious attacks, Fevers, Nausea, Dizziness, Depression of Spirits, etc. It will purify the blood, and give you a refreshing beverage.

It is PURELY VEGETABLE. And has all the power and efficacy of Calomel or other purgatives, without any of the injurious effects.

Having Purchased the Entire Stock of Goods Formerly Belonging to BLACKMER & TAYLOR.

I will carry on the Hardware Business in all its branches, including Wagons, Buggies, All kinds of Agricultural Implements and Machinery.

RIFLE and BLASTING POWDER, Dynamite and all kinds of Mining Supplies. In short, everything ordinarily found in a First Class Hardware Establishment.

I SHALL REMOVE TO THE McNeely Corner where I will be pleased to see all persons who wish to purchase Hardware FOR CASH.

ALL parties indebted to Blackmer & Taylor are requested to make immediate settlement. Their accounts will be in the hands of W. S. BLACKMER who will make settlement.

LUKE BLACKMER, October 23d, 1883.

## Words and Needs.

They do the least Who talk the most; Whose good designs Are all their boast; For words are dew.

They do the most Whose lives possess The sterling stamp Of righteousness; For deeds are true.

And if the heart Be pure and good The life will be Just what it should Not bad but true.

—By James H. Headley.

## Coming.

I know it is coming, coming, I think of it more and more, Of the waves that gleam in the harbor, Of the waves that wash the shore!

Surer than huntsman's arrow, Surer than eagle's flight, Swifter than weaver's shuttle, Swifter than watch of night, I know it is coming, coming, I think of it more and more, Of the lights that gleam in the harbor, Of the waves that wash the shore.

Shall I see those lights in the harbor, Close by the border land? The clasp of a helpful hand? Will there be sadness of wrong? Will my heavy load be lightened— My fainting heart made strong?

I cannot tell—I only know It is coming swift and sure! I cannot tell—I only know "They are blessed who endure." I cannot tell—I only know I think of it more and more, Of the lights that gleam in the harbor, Of the waves that wash the shore.

## A Stranger than Carolinians.

Truth Stranger than Election—Who are These Men?

Cor. News-Observer.

OPELOUSAS, La., October 20, 1883.

To His Excellency T. J. Jarvis, Governor of North Carolina, Raleigh, N. C.

DEAR SIR: My object in addressing you this communication is, if possible, to establish the identity of an individual now confined in our parish jail, and who I have reason to believe is a young man, calling themselves respectively Moore and Wilson, arrived in the parish of St. Martin, in this State, remaining there a few months, they came to this parish where they assumed the names of Woods and Scott. They located in the Atchafalaya swamp, in the extreme southern part of the parish, where they followed wood chopping for an occupation. In the latter part of July of the present year both being sick with malarial fever, they left the swamp and went to Belle Cherie Springs, in the northwestern part of the parish where they assumed the names of W. B. Brown and J. T. Lane. I was at the springs and was thrown in contact with them. They rented a room, had their own cooking utensils and did their own cooking; associated but little with any of the visitors at the springs, but seemed to be quiet genteel men. I next heard of them on the 25th of September. On that day Lane, the younger of the two, committed the most heinous and atrocious murder in this parish. He and his friend Brown immediately started to leave the country. Two gentlemen living in the vicinity of the murder, armed with pistols, mounted their horses and pursued them. The two men seeing they were pursued, turned on their pursuers, and each drawing a pair of revolvers drove them back, telling them to inform all parties, private citizens and officers alike that they never intended to be captured alive. On the following day C. C. Dunson, sheriff of this parish, armed with a bench warrant from my court and accompanied by two of his most reliable deputies, started in pursuit of the fugitives. On the evening of the 28th he came up with them in the adjoining parish. They made a most desperate resistance. Lane was finally shot through the left breast by the sheriff in the immediate region of the heart. Supporting himself against a tree he continued to fire until his finger stiffened so that he could no longer pull the trigger of his pistol. He then surrendered, and died almost immediately. His companion, Brown, though badly wounded in the right hand, did not cease to fire until Lane fell. He then surrendered, and throwing himself on the body of his dying friend, passionately kissed his lips time and again, and then turning to the sheriff piteously entreated him to shoot him and bury him with Lane. Brown then and there in reply to a question put to him by the sheriff, said that he and Lane were first cousins, and that they came from near Asheville, N. C.

## Serious Shakes.

Constantinople the Centre of a Circle of Earthquakes.

CONSTANTINOPLE, October 30.—Ever since the great earthquake of two weeks ago there has been a constantly recurring succession of shocks in all directions from the city, making a circle of earthquakes, of which Constantinople seems to be the geographical center. Yet the centre has not been shaken in the slightest degree. Reports which have been brought every day by Arabs from the desert, Christians on their tours and sailors on ships, have created considerable alarm here, however, and some of the inhabitants of the city have made preparations for hasty flight from sections where the buildings are put up closely. Great landslides have occurred, which came tearing down the steep declivities with the water, sweeping before them every habitation. Chios Island, Samos, Metelin and Lesbos, all a few miles off the western coast of Anatolia, in the Argæan Sea, were all severely shaken up, and there was a large loss of life and property on Samos and Lesbos, while the other two suffered much loss.

## The Louisville Exposition.

Cor. News-Observer.

There are two entrances to the grounds of the exposition, one on Sixth and the other on Fourth street, and street cars run on both streets by the building. The Western Union Telegraph Company have a nicely arranged office just within the main entrance, and messages can be transmitted to all parts of the country. The different railroads also have offices in the building and tickets can be gotten on all the roads running out of the city. Much attention has been given to the general convenience and comfort.

## The Louisville Exposition.

Cor. News-Observer.

The Rogers Locomotive Company, of Paterson, N. J., have an exhibition of two handsome railroad engines, very large and beautifully finished. Cylinder of one 17 by 24 inches, driving wheel 62½ inches, and weight, in working order, 74,500 pounds. The display of machinery and farming utensils is very extensive, and alone occupies about two acres of space. The huge Corliss engine which runs the whole building is a mammoth affair, and has been sold to the Raccoon Mills Manufacturing Co. of Georgia.

## The Louisville Exposition.

Cor. News-Observer.

The Little Giant ice machine, of Cincinnati, Ohio, must have special mention. It is both useful and ornamental. The ice made is very clear and solid. The 1,000 pound machine makes 1,000 pounds in 15 hours, and costs \$1,000, with refrigerator \$1,250. Five hundred pound machine costs \$500. Two ton machine costs \$3,000, and ten ton machine cost \$6,000. Are made all sizes up to 60 tons.

## The Louisville Exposition.

Cor. News-Observer.

Louisville challenges the world on her tobacco display. The Pittsburg Mining Co. and the McHenry Coal Co. make a display of coal that is wonderful. Some of the solid blocks are five feet square. The United States Electric Light Works create quite a sensation. The lights, varying in size and colors, are kept going night and day. The sight of lighting the building at once is well worth seeing. A folding gate is one of the most useful things I saw. You can drive at a four mile gait and open the gate, pass through and shut it without the slightest difficulty. It is very simple, no machinery, and is not at all complicated, and is durable. Every farmer should have one. Price complete \$35.

## The Louisville Exposition.

Cor. News-Observer.

The display of furniture is perfectly amazing. I saw on exhibition the set of furniture used by President Arthur, and the bedstead he slept on. It is handsomely and elaborately carved, and the price of the bedstead alone is one thousand dollars.

## The Louisville Exposition.

Cor. News-Observer.

A woolen machinery company of Philadelphia have a complete woolen and card factory in the building and receive the wool there and manufacture it into beautiful cloth right in the building. In fact they do everything except shear the sheep. The process is very interesting. Another manufacturing company of Philadelphia, likewise gin the cotton, spin it and make it into cloth right before your eyes. These manufacturing mills occupy a large space.

## The Louisville Exposition.

Cor. News-Observer.

A suit of clothes was woven and made entirely at the exposition for Gov. J. H. Berry, of Arkansas, which was worn by him on the occasion of the Arkansas day. This suit of clothes was made from cotton picked from Mr. Hewitt's plantation in Lee county, Arkansas, transported and manufactured in Louisville within the short space of forty-two hours. Just forty-two hours from the time the cotton was picked in Arkansas it was shipped to Louisville and woven into cloth, and made into a suit of clothes in the exposition building.

## The Louisville Exposition.

Cor. News-Observer.

The Tennessee exhibit of minerals, coal, iron, copper, marble, etc., is wonderful. This is one of the finest collections to be seen, and is very extensive. The marble display is remarkable fine, and shows that no place can produce such fine marble as Tennessee. The Alabama exhibit of woods, cotton, etc., is also one of much interest. Kentucky makes a grand display. Her department of fossils is fuller and contains a greater variety of species than has ever been exhibited in the West. The exhibit is contained in thirteen cases, and consists of many thousand specimens, representing 885 species of fossil plants, crinoids, shells, corals, and bryozoa. The Arkansas display of gems, crystals, amethysts, and diamonds, found principally at the Hot Springs, is very interesting.

## The Louisville Exposition.

Cor. News-Observer.

The park of about forty acres and connected with the building is very attractive. It is nicely laid off in walks and squares—handsome fountains are playing all through it—the little lake in it is lovely—rustic seats in it are abundant and all around it is running day and night a train of cars propelled by electricity. It goes at a rapid gait and the coaches are generally filled with passengers. At night when the park is lighted up by the two hundred electric lights, it is difficult for a more sublime sight to be imagined.

## The Louisville Exposition.

Cor. News-Observer.

One of the most interesting sights to be seen is the chicken hatchery. The incubation is perfected entirely
