A SUGGESTION—that the citizens of our town have a ballot box placed at the enrance of the Post Office, labelled "Vote 7. E. BRENER. for Postmaster." Then let every citizen designate his choice for the office of Postmaster by a ballot with the name of his man written clearly on one side and his Raleigh, and which we believe is the ens iest way to get the will of the majority!

THE SKETCHES .- We completed in last week's paper the personal sketches of the business men of this place. They occupied in all, including those of the town and county, about 20 columns of space, or 3,000 lines. It was a much larger task than we had expected, but on the whole a rather pleasant one, in the reflection that it was complimentary to so large a number of our fellow-citizens who have from time to time encouraged the editor of this paper by their patronage. A country newspaper, right or wrong, is generally expected to, and does, perform a large amount of free labor for the community in which it is located. It is to be regretted, however, that the number of those place, and Dr H. H. Eames, of California. in any given community who appreciate such public service is so small as to render it practically of doubtful benefit-to the editor and proprietor, the bulk of whose support comes from outside quarters.

But this aside the sketches were well gotten up, and if embodied in neat pamphlet form, and sent abroad to parties desiring information in regard to the business status and prospects of this town and county, could not fail to be profitable to us. Frequent applications are made through the mails to the Postmaster, the Sheriff, the Register of Deeds, the WATCHMAN, and to private individuals, for information which such ars, all doubts being removed, a book would more fully supply than put under arrest for stealing any private letter could do. The famous "Forty-second Highlanders" (familiarly known in the British Army as the Black Watch) have added one more to their countless exploits by the storming of the Arab intrenchments the Alma, Sept. 20th, 1854. They formed part of the immortal "thin red line topped with steel" against which an over whelming Russian force shattered itself in the memorable attack upon Balaklaya five weeks later. In the advance upon Cormasse during Gen. Wolseley's Ashantee campaign, in January, 1874, the 'Black Watch" bore the brunt of the great fight at Amoaful, suffering severe loss in carrying at the point of the bayonet a thick wood held by native sharpshooters, Indeed, every one must admit that they have fully obeyed the injunction with which their chief led them up the Alma hillside: "Now, my men, make me proud of the Highland Brigade."-New York lively, shining hair.
