Newspaper Laws.

1. Subscribers do not give express notice to the contrary are considered as wishing to continue their subscription.

2. If the subscribers order the discontinuance of their periodicals, the publisher may continue to send them until all arrearages are paid.

3. If subscribers neglect or refuse to take their periodicals from the office to which they are directed, they are responsible until they have notified their billiard ordered their discontinuance.

4. If the subscribers move to other places without informing the publisher, and papers are sent to the former location, they are held responsible.

5. The courts have decided that refusing to take periodicals from the office or removing and leaving them uncollected for, is Prima Facie evidence of intentional fraud.

6. If subscribers pry in advance they are bound to give notice to publishers at the end of their time, if they do not wish to continue taking them, otherwise the publisher is authorized to send it and the subscriber will be responsible until an express notice with payment of all arrearages is sent to the publisher.

The last postal laws are such that newspaper publishers can arrest any one for fraud who takes a paper and refuses to pay for it. Under this law the man who allows his subscription to run along for some time unpaid and then orders the postmaster to mark it "refused" and have a postal card sent notifying the publisher, lays himself liable to arrest and fine the same as for theft, etc.

This question is often heard and nearly as often unanswered. It is not always remembered, as it should be, that the occasion of ill-temper and irritability is often to be found in the physical condition of the person affected.
