The Pneumonia Season.

The cold damp weather of March seems to be the most favorable pneumonia germ. Now is the time to be careful. Pneumonia often results from a cold. The quicker a cold is gotten rid of the less the danger. As soon as the first indications of a cold appear take Chamberlain's Cough Remedy. As to the value of this preparation, ask any one who has used it.

This entertainment is given for the purpose of raising funds with which to purchase supplies to carry on the work of the society for the soldier boys. The demand for supplies is now increasing rapidly and every one is urged to purchase tickets and assist the ladies in the great and necessary work they are doing for the boys at the front. This is no recreation society, but one that is furnishing absolute essentials for care of the sick and wounded and no one who possibly can should hesitate to help along with the work. The boys are being wounded and we cannot afford to let them suffer for articles of relief and life saving attentions.

GREAT CONSERVATION, WHEAT IMPERATIVE

Money Paid's Message Fixes 1-2 Pounds of Wheat Products Weekly Per Person.

Raleigh, March 23.—In the face of a food situation much more critical than it had been thought could possibly come about in the United States, food administration has issued the following new conservation message, a copy which was wired to State Food Administrator Henry A Page today. The state message is as follows:

"If we are to furnish the allies with the necessary proportion of wheat to maintain their war bread from now until next harvest, and this is a military necessity, we must reduce our monthly consumption to 21 million bushels a month against our normal consumption of about 42 million bushels, or 50 percent of our normal consumption. Reserving a margin for distribution to the army and for special cases, this leaves for general consumption approximately one and one half pounds of wheat products weekly per person.

"Many of our consumers are dependent on baker's bread. Such bread must be durable and therefore requires a larger proportion of wheat products than cereal breads baked in the household. Our army and navy require a full allowance. The well to do in our population can make greater sacrifices in the consumption of wheat products than can the poor. In addition, our population in the agricultural districts, where the other cereals are abundant, are more skilled in the preparation of breads from these other cereals than the crowded city and industrial populations.

"With improved transportation we now have available a surplus of potatoes. We also have in the spring months a surplus of milk and we have ample corn and oats for human consumption. The drain on rye and barley as substitutes has already greatly exhausted the supply of these grains.

"To effect the needed saving of wheat we are wholly dependent upon the voluntary assistance of the American people and we ask that the following rules shall be observed:

"First: Household to use not to exceed a total of one and one half pounds per week of wheat products per person. This means not more than one and three fourth pounds of victory bread containing the required percentage of substitutes and about one half pound of cooking flour, macaroni, crackers, pastry, pies, cakes, wheat breakfast cereals all combined.

"Second: Public eating places and clubs to observe two wheatless days per week, Monday and Wednesday, as at present, more readstuffs, macaroni, crackers, pastry, pies, cakes, wheat breakfast cereals, containing total of more than two ounces of wheat flour to be served unless specifically ordered; public eating places not to buy more than six pounds of wheat products per month per guest, thus conforming with limitations requested of householders.

"Third: Retailers not to sell more than one eighth of a barrel to any town customer at any one time and not more than one quarter of a barrel to any country customer at any one time and in no case to sell wheat products without the sale of an equal weight of other cereals.

"Fourth: We ask the bakers and grocers to reduce the volume of victory bread sold by delivery of the three quarter pound loaf where one pound was sold before and corresponding proportions in other weights. We also ask bakers not to increase the amount of their wheat flour purchases beyond 70 percent of the average monthly amount purchased in the four months prior to March

wheat products for non food purposes should cease such use entirely.

Oregon, Ill.—"I took Lydia E.
