THE EFFECTS OF THE DROUGHT.

THE long continued drought has caused serious apprehensions of much suffering in many parts of the country, and of "hard times coming back again," in which all must suffer more famine and pestilence are not beyond the range possibility. The partial fatlute of the wheat and corn crops in serious reduction in our pork and flour supply, and has led already to a sudden fise in the price of all kinds of provisions. It is said that the yield of wheat will be one hundred millions of bushels less. It is difficult to realize the full extentief this great loss in the supply of these cereals and the possithe suffering which it may entail upon a dependent people. In Engbeen quite in Latal as the serious drought in this country, and we may expect Europe to call upon us to are based upon well accredited information, we must prepare for a time of great scarcity ef all the necessaries of life and of such high prices as will cotemporary well says rays that "lessons of this kind are occasionally necesary in the economy of a wise and indulgent Providence, to remind us of our absolute depend once upon His will for every blessing we enjoy, and their chastening influences should not Sep-9-3t. be forgotten or disregarded. A few se sen; of presperity such as we have enjoyed for some years back, are well calculated to make us defiant of calamity, and forgetful of the source of all our bounties, and it is only when the disaster evertakes us and we experience all its hardships, that we come to realize our dependence and appresiste the things we held so lightly in the day of our prosperity. This sistitution too, like all such, must have another good effect, and that is to enforce the great lesson, we are all so apt to forget, that out of the soil presevs life, and only in the sweat of our face, through the Divine favor can we hope to eat bread. The crops fail, or partially fail, and all else fails. The merchant, the manufacturer, the professions, the railroads, the stately ships and "those who go down to the sea in ships" are all dependent upon the farmer for their employment, and the farmer upon the direct favor of Heaven for the rain and sunshine that make his fertile fields productive.

THE PRESIDENTS CONDI-

TION. Since our last issue the President has rallied and very strong hopes are entertained of his recovery. The docfors seem to be sanguine of his restoraton to health, but it is useless to overlook the fact that his condition is still critical.

The following telegram received last Calicoes night is somewhat encouraging:

EXECUTIVE MANSION, WASHINGTON, D. C. Sep. 8th '81.

6:30 p. m.—At noon pulse 94, temperature 9 81-10, respiration 17. Evening dressing half-past five pulse 100, temperature 99 1-10, respiration 18. with apparent relish. President formally thanks retiring physicians.

SUPERIOR COURT.

THE fall term of the Superior Court of Wilson county commenced last Cants Undershirts Monday, and will hold its session two weeks. Hon. W. M. Shipp arrived from Nash Court last Saturday evenmorning. His charge to the Grand Jury was a plain, practical expositionof the criminal law, and of the duties complimented by those competent to low prices judge. Judge Shipp is one of our auto-bellum Judges and won merited distinction as a Judge, when the qualification of those occupying judicial position were of a much higher order than they have been since. He is we believe the only one of the judges of that period now on the bench, and right worthily does he maintain the judicial character won by his distinguished contemporaries, and which has neither been forgotten or unappreciated by the people of the State. Long may he continue to wear the judicial ermine, and dispense justice with his accestomed dignity and padence to his fellow citizens.
