THE STORY OF A HOODOO.

Related by the Piney Woods Negro Who Was the Victim.

The superstition of negroes is proverpiel, and their belief in Vondooism (particularly those of the very ignorant class) is fixed. In three minutes Gresham offhand en lightened the president elect and on the first train started back to Chicago. This incident derives its significance from the fact that, although the prospective secretary of the treasury, Carlisle, who is one of the very ablest lawyers in the country and has paid much attention to

this very question, was at Cleveland's elbow. Although Cleveland at the moment had selected if he had not announced his attorney general, whom he would naturally consult on matters of that kind, it was only Gresham's opinion that would suffice, and he was sent for, even though it was on a question outside of the line of duties to which his future position in the administration related. It shows the confidence Cleveland has in Gresham, and goes far toward indicating the power which the secretary of state, who has always ranked as a Republican, is likely to have in the administration .- Washington Cor. Governor Hogg's Quart Bottler "Do you know that you rarely see a quart bottle? I mean by that a bottle that holds a quart," said B. B. Hart of Mineola, Tex., at the Lindell. "A few years ago, when Jim Hogg, who is now governor of the state of Texas, was prosecuting attorney of Wood county, he filed complaint against every liquor deal-er in the county who had a quart license. He had been investigating the matter and found that the bottles they were selling for quarts would hold only a pint and a half. A little figuring showed that there was a saving to the dealer of 11 gallons of whisky on every barrel he sold by the quart. Scores of cases were filed against each dealer, but on every dealer pleading guilty to one case and promising to sell full quarts in the future the

court dismissed the other cases. "Full quarts were ordered, but when these came they lacked a gill of holding the necessary amount of liquid. Jim Hogg was inexorable and showed the whisky dealer that he was not complying with the statute, and that he would insist on the law being carried out to the etter. Another order was sent in for quart bottles, and as there were none in the market they had to be specially made, and to this day these bottles are known in Wood county as the Jim Hogg quarts. They hold a standard quart, and many an old dram loving granger keeps one, and when he wants his liquor

he takes his bottle with him to town." St. Louis Post-Dispatch. A Muscular Discussion Two little kindergarten pupils were trudging to school and carefully following their teacher's instructions to observe everything in order to discuss what they had seen when school was in session. "Who made the sun?" one of them asked suddenly. "God," was the laconic an-

The Sewage and Public Health Problem. One of the most recent propositions for treating sewage in a manner to conserve the public health is that described by Dr. Burghardt before one of the English engineering societies. This is an electrical process, the active agent, iron, being derived from iron plates placed in cells, through which the sewage constantly flows. One set of cells is positive and the other negative. Only the positive plate is acted upon and dissolved upon its surface, hydrated ferrous oxide being produced by the action of the nas cent oxygen-liberated by the decompo-sition of the water at this pole-acting upon the metallic iron.

This hydrated ferrous oxide, which is a solution, then acts upon the organic matter, becoming first hydrated ferric acid by absorption of oxygen from the air, giving up this oxygen again to the organic matter and becoming the lower oxide-the operation being repeated for a considerable time until the carbonaceous matters which are oxidizable have

been oxidized, when no further reduction of the ferric hydrate can take place, and it remains insoluble and suspended in the effluent as a yellowish precipitate. In order to cause the plates to wear off or dissolve equally the poles are reversed on alternate days, a plate being positive on one day and negative on another day. -Exchange.

Everybody knows what the governor of North Carolina said to the governor of South Carolina, but who has heard what the governor of Texas said to the governor of Louisiana? "Governor, did you say 'when?" as he poured out the liquor. "Governor." was the reply as the glass began to run over, "in the bright lexicon of Louisiana there is no such word as 'when.'"
