

The Wilson Advance,

By W. L. CANTWELL. PUBLISHED EVERY THURSDAY. Entered in the Post Office at Wilson, N. C., as second class mail matter.

THURSDAY, December 7, 1893.

We were glad to see that our Mayor had taken our advice and put some walking tourists to work. Keep up the good work and you will be blessed by the ladies.

Last week the ADVANCE gave its readers the Tariff bill as made public at Washington Tuesday. So far we have not seen this bill in any weekly paper published in the State.

The question of tax, or tariff, is just now occupying a large per cent of the time and attention of the public men of the day. We must say that to our mind it appears a waste of valuable time to make new laws until we find some way of enforcing those now upon the statute books.

If our taxes were levied and collected strictly according to the law we might reduce this rate to one half of one per cent and yet have more money in the public treasury than our present system brings, at two and one-half times this rate.

With free wool we will have more wool and less shoddy in our clothes. The shoddy man is the only one who can reasonably object to free wool.

There will appear in the North American Review for December an article by Senator Peffer, of Kansas, on "The Mission of the Populist Party."

"What Dreams are Made of" is the title of an article by Dr. Louis Robinson that will appear in the North American Review for December.

The letters of Mr. Van Alen to Mr. Gresham and Mr. Cleveland, resigning the office of Ambassador to Italy, are in every way creditable to the writer.

The Tariff Still a Party Football.

The popular reaction can but affect seriously the deliberations of Congress. The hard times have been attributed in large part to uncertainty about the tariff; and many workmen who in 1890 and again in 1892 voted against "McKinleyism," are now suspecting that it was those very votes that precipitated the panic, stopped the factories and threw them out of employment.

Prof. Massey and Hon. S. A. Alexander have recently made a visit to Nebraska for the purpose of investigating the sugar beet culture, and Prof. Massey has made a report to the governor, the purpose of which is to show that the cultivation of the sugar-beet can be made very profitable.

When we call attention of our readers to this matter because it is evident that our farmers must introduce the cultivation of some crop or crops which will yield a better profit than either cotton or tobacco.

Mr. Swelset—Let me see, Christmas is almost here. It comes on the 25th, doesn't it? Mrs. Swelset—I believe that is the date observed by the people generally, but it has become so common, don't you know, that this year and hereafter I shall observe it a week earlier.

Shipments of Texas Tobacco.

Texas roads have of late been bringing considerable tobacco to the New Orleans market, which is a matter of some wonder to railroad men, since heretofore Texas has had very little of this shipped.

Mr. Ellison's cotton trade review shows that spinners in Great Britain have taken this year 150,070,000 pounds less than last season, and that on the continent the falling off was 14,466,000 pounds.

Where Cotton Seed Oil Goes. Last year about 1,250,000 tons of cotton seed were crushed in this country, from which was extracted 1,000,000 barrels of oil, and the Charlotte Observer says this is where it goes:

This unique reminder comes from a Georgia farmer: "The wind bloweth, the farmer soweth, and the subscriber oweth, and the Lord knoweth that we are in need of our dues."

Volcanoes of the United States.

Excluding Alaska, the U. S. may be said to be non-volcanic, states Mr. Ralph S. Carr, but it has not been so long. A chain of volcanoes extend from southern South America into Mexico, then there is a large break and the interrupted chain begins again in Alaska, curves southward, and joins the chain of Japan.

The Washington Post had a cartoon recently called "A Lone Hand," representing the President playing one card, the Queen of the Kanakas. The President wishes to restore the status quo prevailing before Minister Stevens and the marines gobbled up the Islands.

When to Stop Advertising. An English trade journal once requested a number of its largest advertisers to give their opinions concerning the best time to stop advertising, and the following replies were received:

When you perceive it to be the rule that men who never advertise are outstripping their neighbors in the same line of business.

Duality of the Mind.

The idea is held by Dr. B. W. Richardson that the two lobes of the cerebrum give every person two distinct brains; and that any congregation of human beings must be reckoned at twice its individual number before its mental constitution and strength can be properly appraised.

Who have taken Hood's Sarsaparilla what they think of it, and the replies will be positive in its favor. Simply what Hood's Sarsaparilla does, that tells the story of its merit.

It is stated now that the provisional government may call upon England to protect them if the United States should decline to do so.

Rev. J. M. Horner, of Horner's school, has been appointed a member of the Executive Committee of N. C. Teacher's Assembly.
