"Hon. William L. Wilson: "My Dear Sir-The certainty that a conference will be ordered between the two houses of congress, for the purpose of adjusting differences on the subject of tariff legislation, makes it also certain that you will be again called on to do hard service in the cause of tariff

"My public life has been so closely related to the subject, I have so longed for its accomplishment, and I have so often promised its realization to my fellow countrymen as a result of their party, that I hope no excuse is necessary for my earnest appeal to you that in sity be largely the result of honorable sturdy adherence to democratic princisary conditions to the continuation of democratic existence. I cannot rid myself of the feeling that this conference will present the best if not the only hope of true democracy. Indications point to its action as the reliance of those who desire the genuine fruition of democratic effort, the fulfillment of

of democratic promises to the people. As to Democratic Principles. To reconcile differences in the details comprised within the fixed and well dein charge the question whether democratic principles themselves are to be saved or abandoned. There is no excuse for mistaking or misapprehending the feeling and the temper of the rank and file of the democracy, they are downcast under the assertion that their party fails in ability to manage the government, and they are apprehensive the efforts to bring about tariff reform may fail; but they are much more downcast and apprehensive in their fear that democratic principle

may be surrendered. "In these circumstances they cannot do otherwise than to look with confidence to you and those who have patriotically and sincerely championed the cause of tariff reform within the democratic principles. This confidence is vastly suggested by the action under your leadership of the house of representatives upon the bill now pending.

Present Bill Falls Short. Every true democrat and every sincere tariff reformer knows this bill in its present form and as it will be submitted to the conference, falls far short of the consummation for which we have long labored, for which we have suffer ed defeat without discouragement which in its anticipation gave us a rallying cry in our day of triumph, and which in its promise of accomplishment is so interwoven with democratie pledges and democratic success that our abandonment of the cause or the principles upon which it rests means party perfidy and party dishonor.

"One topic will be submitted to the conference which embodies democratic principle so directly that it cannot be compromised. We have in our platforms and in every way possible declared in favor of the free importation of raw materials. We have again and again promised that this should be accorded to our people and our manufactures as soon as the democratic party was invested with the power to determine the tariff policy of the country. Should Provide for Free Raw Material The party now has the power. We are purpose you are right and will not be as certain to day as we have ever been of the great benefit that would accrue to the country from the inauguration of this policy, and nothing has occurred to release us from our obligation to secure this advantage to our people. It must be admitted that no tariff measure can accord with democratic principles and promises, or bear a genuine democratic badge, that does not provide A fair trial guarantees a complete for free raw material. In the circumstances, it may excite our wonder that democrats are willing to depart from this the most democratic of all principles and that the inconsistent absurdity of such a proposed departure should be emphasized by the suggestion that the wool of the farmer be put on the free list and the protection of tariff taxawife of Elbert Denton, of Dysart- tion be placed around the iron ore and coal of corporations and capitalists. NELSON MORRIS & CO. BURNED The Wholesale Market Destroyed by of an Incendiary Origin.

CHICAGO, July 20.-The wholesale market of Nelson Morris and company was burned Wednesday night. The building was located at the head of Root street and was wooden from top to bottom. Within thirty minutes from the time the soldiers on guard duty fired at some prowlers, \$50,000 worth of meats and property had been destroyed. There is no doubt that the fire was incendiary. It started between a row of cars and the building and in a trice the flames had leaped to the roof.

ference Report Possible - Senators Gorman, Mills and Brice Speak on the Situation.

WASHINNTON, July 23.-The point is reached in the house when there is no new measure of such importance as to command the assignment of a day for its consideration. The committee on rules will meet today to decide what committees shall be recognized during the week for presentation of business decided upon by them. It has finally been decided by the managers of the house that the Patterson bill to amend the interstate commerce law to permit the railroad companies under reg-'ulations to be established by the interstate commerce commission to pool their earnings, shall go over to the next session for action. This decision was reached after consultation with friends great pressure brought to bear in favor of immediate consideration. It is believed by many friends of the bill that its passage, together with the recent demonstration of the ability and determination of the government to prothe states, will create a foreign demand for railroad securities that will go far toward terminating the present period of business depression. All interest in bill may be decided by the vote to be taken on the conference report which is now before that body for action. By

Consumption

may be avoided. It comes from a germ that takes root and grows only when the System is Weak and Lungs are affected.

Scott's Emulsion

of Cod-liver Oil, with hypophosphites of lime and soda, overcomes all the conditions which make consumption possible. Physicians, the world over, enendorse it.

Coughs, Colds, Weak Lungs and Emaciation pave the way for Consumption. SCOTT'S EMULSION cures them and makes the system strong.
