No Prospects of Agreement on the Tariff

Washington, July, 30.-It is apparent even to a casual observer, that the House Democrats have determined not to accept the Senate bill without some concessions. Three of the four House conferees, Messrs. Wilson, Montgomery, and Turner, are willing to remain in session until March 4th next, rather than surrender to the Senate. Mr. McMillan, the remaining member of the House committee, is more liberal and is willing to meet the Senate conferees in a more conciliatory spirit. The House conferees know, however, that their position has the endorsement of the President and Speaker Crisp, as well as that of a majority of the leading members of

War has begun in earnest in the East, and all of Europe is on the qui vive. The British, ever fearful of Russia's progress in that quarter, for policy sake, will side with China; for the Bear has a far-reaching paw and is knocking at the doors of China itself. France and Germany are like wise interested. It appears, however, to be European policy to prevent long continued hostilities and efforts will be made to negotiate a peace. While the change is not so specific in wolume, it is very noticeable in the gengral feeling. Excellent crop reports pome from all sections of the south and there is rapid restoration of confidence and strong hopefulness in fall business, There seems to be a revival in industrial investments and several large new plants were established during the week, and capitalists appear to be turning their attention more to the south. The stability of its labor during the recent crisis accounts in some measure for this.
