EYES ON THE SOUTH

Northern Capital Looking About Dixie For Investment.

THE STORY OF PROGRESS IN A WEEK

New Mills, New Enterprises of Various Kinds Dotted Here and There, and a General Feeling of Confidence Throughout the South.

RALEIGH, N. C., March 8.—Special reports to the Manufacturers' Record covering the business interests of the south for the week show that cotton manufacturing matters continue to attract increased attention. Among the new cotton mill enterprises reported for the week is a \$125,000 addition to include 5,000 spindles and 200 looms to a Griffin, Ga., mill. A mill company at Cambridge, N. C., will build an entirely new mill with 12,000 spindles. A \$100,000 company has been organized to build a mill at Central, S. C., and a \$100,000 one for the manufacturing of cotton goods novelties at Rock Hill, S. C. New mills are reported at Prattville, Ala., and Trenton, S. C., and new projects under way at five or six different points in Georgia and several in Alabama, North Carolina and South Carolina.

A \$500,000 company has been organized to mine iron ore in North Carolina and to manufacture wheels.

A \$50,000 construction company has been started in Florida; a \$200,000 water works company in Texas; a \$100,000 steeling company at Rockledge in the same State; a \$100,000 company to erect iron dock facilities at Arkansas Pass.

Miscellaneous enterprises, the past week shows a smaller number than for a considerable time. In railroad construction matters, work has been commenced on a 230-mile line in Arkansas—20 miles having been let to contractors—and contracts for the balance are now pending; and new projects include electric roads in Louisiana and Alabama, 40 miles of new steam railway in Florida, 15 miles in Alabama, and Georgia and a 10-mile branch line in Alabama.

Among the new building enterprises of importance reported for the week was the building to be erected at Newberry, N. C., a new hotel and a \$130,000 enlargement of an old one at Atlanta; hotel in North Carolina, a \$85,000 church, and a \$20,000 society building in the same state, an opera house in South Carolina; and a large number of general buildings in various parts of the south.

Quite a number of northern people are now in the south looking for sites for manufacturing interests, and contracts are pending for the location of several large cotton mills to be built by New England people. At least two of these will probably include the purchase of very large water power.

WHY INMAN FAVORS SILVER.

Cotton is selling in Mexico for 16 1/2 to 17 cents.

NEW YORK, March 7.—Cotton advanced 8 to 10 points and closed steady with sales of 161,200 bales. Liverpool advanced 2 to 2 1/2 points and closed steady.

Mr. Samuel M. Inman, of Atlanta, has just returned from Mexico, and favors silver, as cotton in Mexico is selling at 16 1/2 cents a pound in silver, or equal to about 8 1/2 cents in our money. There is a duty of 4 1/2 cents a pound on cotton in Mexico, and this and other charges, according to calculations made here on a shipment from say Galveston, would cause a loss of 3/8 to 1/2 cent per pound on cotton shipped to Mexico.

TOM DIXON RESIGNS

The Celebrated Gotham Divine to Quit His Pastorate.

WILL ESTABLISH CHURCH OF HIS OWN

Cause of a Young Minister Regarded as One of the Most Remarkable of the Century—North Carolina

of a "Proseur Family."

NEW YORK, March 11.—For a long time past there have been dissensions among the members of the Twenty-third street Baptist church, due to the objection of the more conservative members of the congregation to the "sensational" character of the sermons preached during the last five years by the pastor, Rev. Thomas Dixon, Jr.

Monday morning Mr. Dixon announced his determination to sever his connection with the church and found a new one in a broad and popular platform, and instead of speaking on "speculative" matters, in reply to "an old-fashioned" sermon, in which he announced Mr. Dixon's resignation to his congregation, many portions of which were loudly applauded by the friends of the retiring pastor.

Mr. Dixon's resignation was the result of a dispute over the distribution of the church's funds, which he felt was being mismanaged.

Mr. Dixon is not one of sudden impulse and has no intention of giving up his work, but he felt that it would be impossible to carry out his plan with the church as it was at present constituted.

Mr. Dixon's resignation takes effect May 1st.

Mr. Dixon, who is only 30 years old, was born in North Carolina and is the son of a clergyman. It is said he was elected a member of the legislature of North Carolina when he was 20 years old. He won a gold medal at the North Atlantic conference at Wake Forest college and afterward took a post graduate course at the Johns Hopkins college in Baltimore. He was admitted to the bar, but is giving up the law to preach the gospel, he became a member of the first pastorate here at Raleigh and Goldsboro, N. C.

Mr. Dixon came to New York nearly seven years ago. In 1892 he preached in New York at the First Avenue Baptist church. He recently defended T. C. Platt from the pulpit against the attacks of Rev. Dr. Parkhurst.

Report to the State Department on the Business of Flax Textiles.

WASHINGTON, March 11.—United States Consul Toney at Belfast, Ireland, has just reported that the flax trade in flaxen textiles, the foreign trade in flaxen textiles, he states that 1894 was a very bad year for Belfast on account of the commercial depression in the United States. He says that the greater part of Belfast's flax goods are sold here.

But Mr. Toney said that after the tariff agitation had ended "orders began increasing and business in the textile industry revived until the demands now exist for flaxen goods as they did the time within the past five years."

The revival is so pronounced that it has brought the total exports of linen pieces goods in 1894 up to 156,293,600 yards, as against 153,800,000 yards in 1893 and 137,917,000 in the preceding year, showing a diminution of barely 1 1/2 per cent in quantity and 4 per cent in value, whereas, for seven months ending in July of 1894, as compared with the same months in the five previous years, it has fallen off 20 per cent in quantity and value.
