WHY WILL YOU DO IT.

The new Ambassador from Spain to the United States has performed the discourteous teat of coming from Spain to this country via Cuba a small Island to the immediate South of this country which was in the effete and still is in the present days controlled as a vassal or slave by Spain. There is a little of the "offensive partisanship" the proceeding as it were.

ss & Carolinian, Hickory The above article may be the only thing that many people will see, in re erence to the visit of the Spanish Minister to Cuba and whereas this article may do no harm, it is wrong, in that it tends to mislead the readers of the press. The Spanish Minister did not go to Cuba on a visit and not enoute, in the sense above mentioned, ut for a specific purpose and that ourpose was to get direct information on a question now under consideration between our government and his own. Ie, as minister at Washington, will called upon to act for his home overnment and in order that he ight be the better qualified to so t, he was sent to the locality in nich the trouble originated, to get the evidence at first hand.

At 8 o'clock, p. m. the orator of the occasion, Hon. B. F. Aycock, of Fremont, was introduced to the audience by Mr. Nathan Bass in a short but very appropriate speech. Mr Aycock selected for his subject, "Business Methods, farming and the national wealth."

His address was both instructive and entertaining.

If our people will adhere to the good advice given by Mr. Aycock they will be greatly benefited, and some of the many burdens will gradually be taken from our shoulders.

After the address the audience were highly entertained by the school until half past eleven o'clock. Mr. Parker said that Switzerland has the best system of schools in the world and that this is due to the fact that teaching is there conducted upon the scientific principles outlined and put into practice by the great reformer Pestalozzi. The school house is more important in a Swiss village than the court house, jail, or other public building. What has been done in this small country of mountains can be done in North Carolina if the teachers will prepare themselves by studying the science of education and then teach in accordance with the great principles of intellectual, moral and physi-
