Tobacco Growing.

No crop in the South has so many enemies to contend with as tobacco. These begin to harass the existence a few days ago. of the plant as soon as it lifts its head above the surface of the plant bed. The horn worm plies its avocation in June and July and tries to destroy has been badly injured by frost. the crop. After the leaves are gathered and manufactured then the antitobacco crank begins his work, and 50 really for the bewitching [weed there Remit by draft, post-office order or is no rest until its substance is lost in

There are different kinds of insects which attack the plant during its growth, and which must be guarded without the name of the writer being growth, and which must be guarded known to the Editor. Address all coragainst vigilantly. The first is the flea bug which does its work in the plant-bed. Then comes the cut worm, THURSDAY, - - : April 25, 1895. the pest which attacks the plant first after it is set out. The bud worm Every woman who gets a divorce begins later and destroys the growth of the plant. The last of all is the horn worm and the most deadly in Some half a dozen clerks were all its ravages on the plant-the one

The flea bug is the first to attack tobacco and begins its depredations in the plant bed soon after the plants are up. The most satisfactory way of destruction is to apply to the young plants plaster in which rags saturated with kerosene oil have lain for a short while. If the insects are very troublesome cover the plants with the plaster and repeat after each rain if necessary. Keep a close watch on the plant bed. Planters the war. MINISTER Ransom has arrived in who do not canvas their plant beds Mexico, he was tendered a most flat- find that green cedar brush scattered tering reception. Mexico does not over the surface is often effective in feel at all badly over the licking we driving away the flea bug. These little pests are worse some seasons than others, and nothing but the THE Democratic State Executive closest watchfulness will insure the

In April or May or even in early June, when the plants have been set in the fields, the cut worm begins its WE learn from good authority work. This is nothing more than the that twenty five were implicated. that the Legislature appointed as a ordinary cut worm which crawls durmagistrate for one of the townships ing the night and cuts off the tender by hand, and when they are many a close watch should be maintained for them. Stuble lands and such as have been allowed to grow off in weeds of clover the year before are prolific

> Of all the insects which intest the tobacco plant the bud worm is per hapst the least troublesome, and yet it will do great damage to a crop unless watched. Its home is in the tender bud of the tobacco stalk where it teeds on tender heart leaves, so that when they grow out they are perforated with hotes and almost useless for anything except trash. The only way to rid the plant of the pest is to hunt them down and kill them, which is a slow and tedious job. - Ex.

veilders of this troublesome pest.

An Interesting Feature.

One of the greatest and most pic-

turesque attractions at the Cotton States & International Exposition will be the production of a beautiful his toric spectacular play based on the career of Hernando DeSoto and his and of Spanish cavaliers in the early history of America. A company of New York and Atlanta capitalists has Leen organized by Mrs. Littleton with a capital stock of \$100,000 to produce this spectactular drama. They will erect a theater, and present n a series of magnificent' scenes the omantic and adventurous career of DeSoto in Georgia, Alabama and Florida. As the story goes, DeSoto grandees landed in América in search were drunk and made threats that of a fabulous empire, in which gold they would not be arrested. The of In pursuit of this myth they marched but were over powered. Officer W. northward. A beautiful Indian queen H. Woodard being hit over the head captivity. When they reached the After several attempts the officers ar now stands, they found a superior placed in the lockup and guarded by race of Indians. They were enter- the citizens. ON CRUTCHES 2 WEEKS

Limb Raw as Beef and Red as Beet. Pain, Burning, and Itching Terrible. Not 5 Hours Sleep in 3 Days. Makes One Application of Cuticura and in 5 Minutes is Asleep. A Remarkable

About two years ago I was confined to my room with a breaking out on my leg which my physician pronounced Eczema. About three weeks ago the same disease broke out again on the same leg, and my physician has been attending me regularly, calling from once to twice daily, the sores all the time getting worse. A friend called to see me, and brought about one half teaspoonful or Cuticura, advising me to try it, telling of himself, brothers and mother having been cured by it. I would mother having been cured by it. I would not try it at first, although I had been on crutches for over two weeks, and at one time I counted between twenty-five and thirty suppurcounted between twenty-five and thirty suppurating sores, and had not slept more than five hours in three nights. Monday morning about four o'clock the pain, burning and itching became so severe that I netermined to try Curicura, thinking that if it did no good, it could not make my leg much worse, for it was as raw as a piece of beef and as red as a beet, so I applied the Curicura, and in five minutes after I laid down I was asleep. Next day I sent and got a box of Curicura, and I'll pledge my honest word I would not take \$100 to-day for it, if I could not get another. I commenced using Curicura Monday morning about four o'clock, and to-day (Thesday) my leg is nearly well, notwithstanding I had not walked a step without my cratches in two weeks. My gratitude to the man who first compounded Curicura is profound. May God bless him.
