### MORTGAGED HOMES.

LESS THAN ONE-SIXTH OF THE ENTIRE NUMBER ENCUMBERED.

The count of the home and farm transcript has been completed by the census office. The results are very nearly correct though the figures are subject to a slight modification. There were returned by the enumerators for the United States 2,491,930 farms and homes occupied by owners and incumbered by mortgages. This number included some farms and homes about which the enumerators made no report and which belong partly to the class of hired and partly to the class of owned free, as well as partly to the class of owned and incumbered. Until this unknown quantity is eliminated it may be regarded as approximately true that two and a quarter million families of the twelve and a half million families of the United States occupy and own incumbered farms and homes, and that ten and a quarter million families occupy farms and homes that are either hired or owned free—the proprietors of hired and owned free will be known when the population division completes the count of the points. The preliminary results indicate that the average debt for a farm in Iowa is \$1-283; home, \$719; average debt for a farm and home, \$1,140. If these averages hold good for the Union, the incumbrance on the farms and homes of United States occupied by owners is about \$2,565,000,000. The success of this investigation has been for beyond the anticipation of the most experienced statisticians and the result will be of immense interest and value to the nation. Incomplete returns from several Western States indicate that farms and homes are mortgaged for about one-third the value put upon them by the owners.

"Just as Good."

Say some dealers who try to sell as a substitute preparation when a customer calls for Hood's Sarsaparilla. Do not allow any such false statements as this induce you to buy what you do not want. Remember that the only reason for making it is that a few cents more profit will be made on the substitute. Insist upon having the best medicine—Hood's Sarsaparilla. It is peculiar to itself.

### A COTTON CHOPPER.

ITS INVENTOR, MR. W. H. J. GOODWIN, BELIEVES HE HAS A FORTUNE.

Mr. W. H. J. Goodwin, a well known farmer of Wake county, sent on to Washington, D. C., to secure a patent, on his newly invented cotton chopper. He has given it several tests, and has been thinking and working upon it more than ten years. It will chop and side up ten acres of cotton per day, and is a very simple machine. Several good farmers have seen it at work, and they agree that it is the very thing, and that it will tend to cheapen the cost of cotton very much. Mr. Goodwin says that its success is not problematical, but already established, and that he would not to-day take \$100,000 cash for it. When the patent is issued, Mr. Goodwin is going to have a big barbecue and have an exposition of the workings of his invention. He has planted a crop of cotton that will be ready soon upon which a test will be made with the cotton chopper.—Raleigh Chronicle.

### HOW I WAS CURED OF SO-CALLED CANCER.

Lulaton, Ga.  
Dear Sir—This is to certify that I was a sufferer with a place on my under lip for fourteen years, and was under treatment of different physicians, but they done me no good. I had lost hope of being cured by medical treatment. I then went to a doctor living in Florida, who treated them by art. After going to him it got well, apparently, for a while, but returned as bad as ever. I then concluded to try P. P. P. (Prickly Ash, Poke Root and Potassium), and after taking five bottles, (pint size) was cured. I also find it a good medicine to give a good appetite, and to give proper digestion.

Yours most truly,  
L. J. Strickland,

Syphilis, Rheumatism, Old Sores and Ulcers, Scrofula and Catarrh are exactly that are cured by that powerful medicine, P. P. P.

### HE NEEDED WATCHING.

THE PIOUS-LOOKING STRANGER WAS TOO HONEST FOR THE FARMER TO TRUST.

Over in Missouri there is a certain plank road and a certain toll gate. Beside the toll gate there is a farm house on the cool and comfortable porch whereof the worthy farmer usually sits, waiting to collect toll, while his boy Bill ploughs the corn in the field away beyond. On a certain recent occasion, however, this farmer happened to be over in the field helping his boy Bill when a pious-looking stranger drove up to the toll gate. There was no one in the farm house, no one nearer than the farmer and his boy Bill, half a mile away in the field. The toll gate was unlocked—open in fact—but this pious stranger was temptation-proof. He hitched his horse to a tree and proudly floundered out to where the farmer and his boy Bill were at work.

"My good man," said he, "are you the keeper of this toll gate?"

"Yep," said that worthy farmer.

"What is the toll, my good man?"

"Five cents."

"Well, I wish to drive through, my good man, and here is your five cents."

The worthy farmer scratched his head anxiously for a brief period. "Did you come out here just to give me that nickel?" he asked presently.

"For no other purpose, my good sir," and the pious-appearing man ambled soulfully away.

"Bill," said the farmer to his boy in an agitated undertone, "get on the old gray mare and watch that stranger till he gets to town."—Quincy Herald.

### \$1,000 REWARD.

Our American chemists are renowned, not only for their enterprise, but for their vigilance. They are prompt to expose frauds whenever they find them. Thus far, however, they have not earned the reward of one thousand (\$1,000) dollars offered by the proprietors of Swift Specific (S. S. S.) for the discovery by analysis, of a particle of mercury, iodide of potash, or any poisonous substance, in their famous medicine. The reason the reward has not been picked up is because there are no mineral or poisonous substances in Swift's Specific (S. S. S.) It is a vegetable compound, which has been before the public for half a century, and its history is marked by a wonderful series of successes.
