## INTERESTING FIGURES.

From the most reliable information we can gain it now appears to be certain that the silver men will centrol the Na tional Democratic Convention, Some one has figured out that the silver people will not only carry all of the Southern States but will control nearly all of the Western ones and probably Ohio, Indiana and Illinois.

Be this as it may, the following table showing just how they will stand is interesting

The total number of votes in the convention will be 922. The free normal coinage States with their votes are:

Alabama. Arkansas California, Colorado. Florida. Georgia, Idaho, Illinois. Indiana, Iowa. Kansas, Kentucky. Louisiana. Michigan, Minnesota, Mississippi, Missouri. Montana.

Nebraska, Nevada. North Carolina North Dakota, Ohio. Oregon, South Carolina,

South Dakota, Tennessee, Texas. Utah, Virginia, Washington, West Virginia. Wisconsin,

Wyoming. Arizona. New Mexico. Oklahoma. Total.

The only States in the above list which are considered doubtful by the silverites who have figured on the result, are Nebraska, West Virginia, and Minnesota. Deduct these votes and the free coinage; men would still largely control.

It takes two thirds of a convention to nominate a president, but the platform is adopted by a majority vote. There- his injuries are fital. fore, it would seem practically certain that the free coinage democrats will control the convention.
