CONSERVATION OF FISH.

Roanoler-Chiwan Tonics.

In these dark days when our be loved country is engaged in the greatest war in history, and will be doubtless called upon to make will greater sacrifices that the world may be made safe from Prussim militarism; when our National government is urging the structs economy and the conservation of all foods that our soldiers at the front and in the training camps may be fed, sees our duty not only to see that our food laws and reg ulmons are complied walls, bu where food is unnecessarily destroyed and there is seemingly in statute to prevent it we should use no time in securing the metersary tegralation to remedy the waste.

Far-more than thirty years the United States government has maintained a lish hardhers in Web tary streams with edible field, and chimoconemic be always give saids. Sunday. Dr. Huffbam will fill still maintains us hatchery there: facing,"

The remains were brought to The young gendens

mill at that place A bill was introduced in the law Legislature to prevent the pollintion of the waters of the Roanokbut powerful influences were brought tom play and if it ever got

The paper will could flup its agent chemicals in some other change would con some money. so it is allowed to destroy finteries on the Romoke, to destroy vestes rights, that its dividends may be

The paper mill is a Halifax corporumon and is lucated on the Harl that side of the river. The south ern bank of Roanoke river in the line between Hallfax and North ampton, so the river on the borders of Normampron, where the great damage is done in destroy ing he fish, is wholly in North ampion. This makes it the days of the representatives of North ampron to oring this matter to the attention of the Legislature and leave nothing undotte that will right. the wrong that is being done in destroying the fish within the county

To protect the waters of the Rosnoke from pollution and restore to our people the fishing privileges and rights in its waters should be one of the planks on which our next condidates for the Legislature should spind.

We heartily agree with our neighbor in this matter. If these of this great blood and herve remchemicals that are turned into the river from this paper mill are known to destroy the fish, they long and prospershould be disposed of in somcomer way, without polluting the waters of me Romoke.

I beman the age of forty a man mere women he vamily loved at twenty he reshizes that luck was with him, after all.
