LATE reports from France have spurred many a slow thinker into buying thrift stamps. Catarrhal Deafness Can't be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; since cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Medicine.

FUEL ADMINISTRATOR APPEALS

To Coal Producers and Consumers to Assist in Supplying Com-
line Year's Demands.

Fuel Administrator Harry A. Garfield has made the following statement:

"We begin the new year of 1918-19 with an obligation resting upon every citizen of the United States to do his part, in order that the coal supply of the country may be made adequate to meet the home needs of our people, and the ever-increasing demands for coal for fuel which grew out of the conflict in which we are now engaged. The Fuel Administration must have the support and the active co-operation not only of those who are engaged in production and distribution of fuel, but of every coal user in the country. Each must bear his share of the personal sacrifice which must be made if the coal supply is to be properly increased and adequately distributed.

"An adequate coal supply is vital in the winning of the war. Without it we can not make munitions or other war supplies or build the ships which must carry men to the battle front. Without it industries will be stopped, labor thrown out of employment, and the homes of the people will be cold.

"Guided by the experience of the past winter the Fuel Administration has taken the necessary steps to clear the way for the ceaseless activity of the mines of the country in increasing the supply and for the steady, swift distribution of the Nation's fuel as rapidly as it can be taken from the ground and moved over our overburdened transportation systems.

"The prices fixed by the Government for coal at the mine have now been established on a stable foundation which will not be disturbed during the coming coal year, except in cases of extraordinary urgency. These prices have been adjusted by scientific and practical investigation based upon uniform cost sheet reports to insure the greatest possible stimulation of production while maintaining a reasonable and equitable price of coal to the consumer.

"By carefully drawn regulations, the Fuel Administration has insured the shipment of 'clean coal' from the mines. Coal containing an undue amount of foreign matter will be penalized in price, and producers who take extraordinary measures in the preparation of their coal will be recompensed. These measures will keep off the railroad and out of the bins of the consumers a large amount of unburnable material which was included in last year's coal production.

"Every effort has been made by the Fuel Administration to so arrange the distribution of the coal supply that it will impose the least possible burden upon the railroads of the country. Through the zone system of distribution, which became effective April 1, the movement of tonnage coal between the mine and the producer will be restricted to the shortest possible transportation lines consistent with the maintenance of an adequate and proper coal supply to all consumers.

"In arranging these restrictions, the Fuel Administration, in many cases, has allowed to consuming territory producing fields which can only fill the demand of the consumers they must supply, if production is maintained steadily throughout the year.

"The Fuel Administration expects the coal consumers, commencing their patriotic co-operation with the Government in all its war measures, to maintain a steady and constant demand for coal in order to attain this result. Consumers must buy their winter supply of coal during the spring and summer for storage during the winter if the production is to be maintained at a maximum and the country enabled to avoid a serious coal shortage this winter. The Fuel Administration will co-operate with all communities in an effort to provide storage for emergency stocks of coal to be set aside during the spring and summer to meet the emergencies of weather and transportation which may arise next winter.

"But the great storage capacity of the country lies in the bins of the individual consumer, and there the country's coal reserve must be built up during the spring and summer when coal production is unhindered and the transportation facilities of the country operating at their highest efficiency.

"As an inducement to 'early buying' the prices of anthracite coal have been reduced 30 cents a ton on all domestic sizes from April 1 to August 31, and in many of the bituminous fields prices have been cut to an even greater extent.

"To safeguard the consumer the Fuel Administration has prescribed regulations to prevent profiteering and to govern the distribution of coal by licensed jobbers and by retailers.

Each domestic consumer will be permitted to secure a full normal supply of coal, but no more. "Every lot of coal that is hoarded against future needs and is not used during the winter is actual waste. The law and regulations have been used to bring the coal to the consumer and the consumer should use it wisely and should not hoard it against future needs. Every shovel-full saved means help for the industries in turning out supplies for our troops abroad; help for the ships that must bridge the 3,000-mile gap between our shores and the battle front; and help toward ultimate victory.

"WELDON 33 YEARS AGO. From The Roanoke News, April 9-16, 1885. Died in Sunday last at the residence of her husband about five miles from this place, of pneumonia, Mrs. Ann Harvel, in the 54th year of her age.

RUINED TO DEATH.—On Thursday last at his home near Gaston, Harrison Fenton, colored, who was a cripple, fell to the fire and before he could awake any of his family and get help he was so badly burned that he subsequently died.

DEATH.—On Friday morning after a protracted illness Mrs. Martha A. Clark died at her residence in this place, in the 70th year of her age. She was buried at the cemetery. She had been a consistent member of the M. E. church for a number of years and leaves many sorrowing friends.

Capt. W. H. McGee, who has been running the passenger train on the Atlantic Coast Line in place of Capt. Jordan, who has been sick. Our popular dentist, Dr. J. E. Shields, went to Lenoir this week on professional business.

DIED.—At his residence a few miles from this place Mr. A. E. Harvel died of pneumonia on the 9th of his 73rd year. He survived his wife four days. Mr. Harvel was a good neighbor and good citizen.

CONNECTED OF FIRST DEGREE MURDER.—John Rogers, colored, who killed M. F. Peckles, near Margaretsville on the 4th of December last in a fight was tried at Northampton court last week. The State was represented by Solicitor Collins, Messrs. R. B. Peckles, W. W. Peckles and W. C. Bowen. The prisoner was defended by Mr. B. S. Gay. The case was ably conducted on both sides and the jury after being out about an hour, returned a verdict of guilty of murder in the first degree and the prisoner was sentenced to be hung on the 24th of June.

DRAFTED MEN TAKE NOTICE. The Civilian Relief Committee of the Weldon Red Cross wishes to impress upon the newly drafted men the importance of attending to certain duties before leaving for camp, which will save them and their families from unnecessary worry and hardship later on, and in this connection beg to make the following suggestion:

1. No man should leave without understanding what he should do in regard to the allotment of his wages and what his privileges are with regard to securing the government allowance for his family.

2. Every man should understand fully the insurance law. It is especially important that single men should secure this insurance, as in case of being permanently incapacitated for military duty, it will take care of them for life.

3. Every man ought to know that he can write to the Red Cross if he is anxious about his family or any of his affairs at home.

4. It is also very important that men should leave power of attorney with some one; that they write home promptly on arrival at camp; that they make their will; keep in close touch with their home folks, and that they acquaint their families with their official number as soon as it is assigned to them.

5. The Red Cross should be used as a means of communication between the Government, the men and their families. The Committee will take pleasure in helping in any way that it can.
