On Wednesday of last week, Leon Tucker, one of the high school boys, was shot and painfully wounded by a gun in the hands of Dan Trueblood, another school boy. This was purely accidental. Young Trueblood was cleaning his rifle, not knowing it was loaded, and just as Tucker came up it was discharged, -the ball entering his thigh just below the groin. The young man was taken to a hospital for treatment. Mr. Tucker is from Northampton county and we trust will only have holiday a few days. You cannot be too careful in handling a gun. It is generally the damage.

ARL GIRLS' ANKLES GETTING BIGGER?

Dollie Varden, according to the old song, had dainty little feet and ankles but according to the mod ern observer. Dolly never wore low shoes in season and out of season. The result was that Dol- genuine, sincere, a gentleman with ly's ankles were kept neat and ankles are getting anything but

It ias long been the boast of adhere its of the American girl that nowhere on earth are there to be foun I ankles as small as in this land. It was considered a mark of beauty in the Orient for the girl to be able to encircle her ankle with the fingers of one hand. This was no trick for the average American girl, once a day.

Since the vogue of the low shoe things are different. The ankles are getting a trifle larger, and the girls say frankly "Why not?" They claim it is due more to the fact that they walk more, and take more exercise than their mothers and grandmothers did. Which is to blame for the larger ankles-exercise or low shoes?

AN OLD APPLE TREE.

There is on the farm of Mr. D. M. Woodard, one mile west of Pendleton, 1018 (Northampton) county, perhaps the oldest apple tree in the Roanoke-Chowan sec tion, if not in the State. Mr. Wood ard informs us that his aunt, Nan cy Stephenson, was born on the farm and if she were living would be 102 years old. She told him is was a very, very old tree when she could first recollect. Her grandson, Judge Gilbert T. Stephenson, of Winston Salem, cut a limb from this tree and had a cant made from it. This old apple tree has borne apples every year since those now living in the neighbor hood can recollect. - Roanoke

RAISINS AND YEAST.

Disease?

Is there a new disease among us since prohibition and the vogue of earing for health? "An apple a day keeps the doctor away," is a slogan popularized by national advertising. Following close on its heels was the drive made by the raisin growers of the Pacific coast, who have been educating the pubhe up to eating raisins, for what ailed them and didn't ail them. The more recent campaign to make yeast in edible form popular

is still with us. It was the combination of the two latter that has been responsisible for the coining of a new disease. A young lady of Stillwater, Minnesota, has been a consistent consumer of raising since he yeast diet reached the stage of

were a slight feeling of elation that was becoming more pronounced the case as intoxication, but on inquiry found that no liquor had see a snow storm. As for us, we fermentation had begun inside the young lady from Stillwater and going on in the way it did, alcohol of sufficient quantity to intoxicate her was the result. She is continuing her diet but does not eat raiins and yeast at the same time.

Here is a good chance for the writers of limericks to tell what happened. The first line is furmished free, as follows: "There was a young lady from Stillwater." Fill it our to suit.
