Professor Fisher. of Munich, has succeeded in obtaining from distilled coal white crystalline powder, which, as far as regards its action on the human system, cannot be distinguished from quinine except that it assimilates even more readily with the stomach. Its efficacy in reduc-ing fever heat is said to be remarkable, even rendering the use of ice unnecessary. The importance of such a discovery as this consists not so much in the actual fact achieved as in the stimu lus given to scientific research by the opening of a new channel of investigation. The romance of gas tar is evi dently far from being exhausted. In addition to the sweetest scents, the most brilliant dyes, the most powerful disinfectants, and even prussic acid are

Between Vanderbilt and Gould there is a certain conservative understanding. Both know that panies are bad things for either. Vanderbilt probably dislikes Gould, considers him treacherous, yet Gould does more to steady the stock market than Vanderbilt, and they are therefore compelled to accept each other as accessories. Gould uses Vanderbilt to refer to as an example of solvency and stability. Vanderbilt knows too much to provoke Gonld, and therefore they keep their hands off each other. Mr. Vanderbilt has a strong, rather coarse nature. He is weaker than his father, not much cultivated, and among his friends are few men of tell in their lives so much as in their Vanderbilt was a stern parent, a hard taskmaster, and he had a few plain principles which he thrashed into his
