THE SUN.

NEW YORK, 1884.

About sixty million coples of THE SUN have gone out of our establishment during the past twelve months. If you were to paste end to end all the colamns of all THE SUNS printed and sold last year you would get a continuous strip of interesting information, common sense wisdom, sound doctrire, and sane wit, long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and then three-quar ters of the way back to the moon again.

But THE SUN is Written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty seven or twenty-eight times. If every buyer of a copy of THE SUN during the past year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1883 has afforded the human race thirteen thousand years

of steady reading, night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, goods at or of its influence on the opinions and actions of American men and women. THE SUN is, and will continue to be, a news paper which tells the truth without fear of

consequences, which gets at the facts no mater how much the process costs, which pre sents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which there fore believes that the Republican party must go, and must go in this coming year of our Lord, 1884. If you know THE SUN, you like it already and you will read it with accustomed diligence
