nov 26 to 1stp d&wly The war cloud in Europe gets bigger and there are some who say that it will surely burst in the Spring.

Senator Ransom introduced yes terday in the Senate a bill appropriating \$500,000 for the erection of a light house on Diamond Shoals, near Cape Hatteras, and we hope that it will become a law.

States Rights are booming. Why, upon the decision of a court of law, the highest in the Union. Still, it is a fact, and it is a further fact that the Democratic party is, and has been, the firm and unwavering exponent of the rights of the States. It was on this issue that the late terrible war was inaugurated and it is on this issue that the party is now triumphing, nearly a quarter of a century after the close of the war.

The Reading people at the North who are fighting the railroad strikers and the coal miners are meeting with some of the opprobrium they deserve. We believe in the rights of both capital and labor, but we do not believe in oppression of any kind. It is evident that the purse proud railroad and coal mine mag nates have the wrong sow by the ear in this fight. The strikers have not only justice and right on their side, in this instance, but they have a large portion of the public sympathy. They have ours, at all events.

Jay Gould and Russell Sage may yet stand in the felon's dock, to answer to the charge of grand larceny. There is really some prospect of it. They are charged with having wrongfully converted to their own use a large amount of railroad property. The offense was committed three years ago and apparently nothing but the statute of limitation can save them, if, indeed, there is salt enough in that. If the offense is held as a continuous one then an indictment, it is said, will surely follow. It is alleged that this had something to do with Gould's Med iterranean tour.

The pension business has been well-nigh run into the ground and it is time to call a halt. There has been too much of it and the people of the South, who pay their proportion but get nothing in return, are sufficiently amused with what has already been done, without going any further in the matter. We would not disturb any of the existing laws but we are opposed to any further legislation on the subject. We have been whipped and have for years past been paying out enormous amounts to those who whipped us. We are willing to pay pensions to those who were wounded or disabled in the service but beyond this we are not willing to go one step. There are thousands of poor, disabled Confederates in the South who not only have no pension money to look to for themselves but who are side who were disabled. This is bad Jacobi's, who is the factory agent.

enough but it should go no further. The proposed pensions to all who were in the Federal service is too harsh and unjust to the men of the South to receive one moment of serious consideration at their hands The people of the Southern States should stand as one man against the unrighteous proposal and it is sure that such a law cannot be passed without their consent. There is a city of some pretensions out in Nebraska called Lincoln-so pot. named, we suppose, in honor of Abraham Lincoln—and it is this little city that has been destined to become the champion of the very principles for which the people of the South fought and suffered for four long and . eary years. Recently the Mayor and Council of the city removed for cause the police judge of the municipality and summoned him for trial. He appealed to the U.S. Circuit Court (which had nothing whatever to do with the case) and a restraining order was issued. This the Mayor and Council refused to obey and they were arrested for contempt. The case was carried to the Supreme Court of the United States and yes terday a judgment was rendered in favor of the authorities, the decision of the Court being that the Federal Court has no jurisdiction whatever over criminal cases, including the appointment and removal of State and municipal officers.
