VOL XII.

The State authorities of Florida have ordered that the entire village of Plant City, in that State, be burned to the ground, including all buildings, furniture, bedding, &c, in order to stamp out the so-called yellow or malarial fever there.

The railroad from Buenos Ayres to the foot of the Andes has on it what is probably the longest tangent in the world. - It runs 211 miles on a "bee line" without a curve, and during the distance there is not a single bridge, no opening larger than an ordinary culvert, and not a cut nor a fill exceeding three and onefourth feet.

The proposed bridge over the Hudson River at New York City is certainly the most stupendous un dertaking of its kind yet proposed in this country. The cost is estima. a afford drapeptic. Some vice ... Dr. Steiner of ted at \$42 000,000, or nearly twice as to the Fiamons Liver much as that of the Brooklyn bridge The bridge proper is to absorb \$16. 000,000 of this, the approaches \$12,-000,000, and the land necessary for the approaches \$14,000,000. There is to be but one span over the stream, which is a good deal wider at its narrowest available point than the East River at its broadest.

Senator Vance has revived an old chestnut and applied it to a new use. The Washington correspondent of the New York Herald says: They were talking about the possibility of an early adjournment as they lingered over their cigars and appolinaris in the Senace cloak room yesterday. By "they" is meant a little gronp of Senators compris-ing Messrs. Vance, Hearst, Beck, Gorman and Ransom. Mr. Vance being appealed to for his opinion regarding the matter replied: "I can't answer your question definitely, but I can tell you a story that is very apropos to the situation. Two friends of mine in North Carolina were spending the night on one occasion in an old country inn. The night was warm, and one of the gentlemen arose to open the win dow. The glass doors of an old cup board, which he supposed to be the window, were the first object upon which his hands rested. Failing to raise them he struck them with a bootjack, making quite a large hole. As he returned to bed his friend asked him how it looked outside. He stuck his head through the hole, and as he withdrew it he exclaimed 'It's dark as h---- and it smells like old cheese.' So it is, gentlemen, with regard to adjournment. The outlook is as dark as hades and it

The Passport Has Gone.

We are sorry to hear that the steamer Passport has left us. She sailed this afternoon for New York. where she will run as a passenger boat between that city and Fort Hamilton, for which purpose she has been chartered. She will return here about the first of November and will resume her towing business at this port. Capt. W. A. Snell will remain in command of her. The Passport has ever been and ever will be a great favorite with our people. She has been on the Cape Fear for nearly eleven years.

A Stranger Here. Mr. W. A. Bryan, while fishing from the bridge at the Hummocks vesterday, caught a fish that is a perfect stranger to these waters. It was a small fish, only 7 or 8 inches long, almost round, flat, of a flesh color, with irregular black streaks on its sides. There was a dorsal fin, 3 or 4 inches long, sticking straight up from the back and as hard as a piece of bone. It had a very small mouth, too small to have taken the hook. Mr. Bryan hooked it on the outside. We looked hasily through Cuyier this morning, and also another work on natural history, in the fish department, but could not find it in ither.

WASHINGTON, D. C., July 29, '88.

The decision of the Republican caucus of the Senate to bring in a substitute tariff bill will probably prolong this session of Congress till October and thus make it the most remarkable one on record. The longest one on record up to now was the first session of the 31st Congress. which ended September 30th, 1850, after lasting 302 days. Howell Cobb was Speaker, and it was during the Kansas Nebraska discussion. Other long sessions were the 27th, 32nd,

The Fayettevllle Independent Light Infantry got back home on Friday and the Journal of that city has this to say in consequence thereof:

The F. I. L. I. returned home in full force by yesterday's train. They are all agreed that the newspaper accounts of camp life are not exaggerated. Some, however, with whom we have talked, could hardly find words for any other than the last day, the stringency of military rule was considerably modified, and the boys were permitted to go about and do as they pleased. As naturally then as a duck takes to water, they sought out the fair sex, and we would judge from conversation that countable for many heartbreaks, aches, and sighs, and the Encampment of '88 has a more than ordinary number to account for. Some of the fair Wilmington damsels have taken a deep hold upon the hearts of a number of our boys, and we fear that the result will be that some "best girl" will suffer, thereby (temporary, however, no doubt. We think our boys would vote almost a unit to have the annual camp pitched at Wrightsville.
