During the past year encouraging progress has been made in the work of causing the substitution of automatic couplers for the old link-andpin coupler on railroad trains. It is estimated that more than 500 emploves are killed every year while using the old couplers, and that ten times as many are severely injured. After thorough investigation and discussion the Master Car Building Association recommended the use of a certain type of aftomatic coupler as a standard. One railway system road has recently ordered that all new cars shall be equipped with couplers of this type. The Railroad Guzette says that the type "is now in a form so perfect and its advantages over all other types are so widely acknowledged that its use has become rather a commercial question than a technical one."

Fourth, the sess ions of Congress to begin in January instead of December."

The New York Times says: "The first public observations of Presidents-elect after their election are apt to be taken as the 'keynotes' of their administration. Gen. Harrison made at a meeting of his Grand Army Post in Indianapolis on New Year's Day some remarks that were reported, and that it is fair to as sume were considered beforehand. If any significance is to be attached to these his personal 'keynote' is the solid South. 'The only menace,' he said, 'to our institutions and to the perpetuity of our Government was the suppression of a free and fair ballot. He would like to hear a bugle call throughout the land demanding a pure ballot. A free ballot, honestly expressed and fairly counted, is the main safeguard of our institutions, and its suppression under any circumstances cannot be tolerated.""

The New York World is earnestly advocating the imposition of an income tax in that State. In course of its argument in favor of this new departure the World says: "A tax upon incomes of \$10,000 and over, graded according to the amount, would reach those only who are well able to pay. A tax upon a small merchant's or a mechanic's home or upon a farm is often a levy on one to whom the payment is a real hardship. By placing the burden of taxation upon real estate the rent and living expenses of the poor are imperceptibly but surely increased out of all proportion to the protection which they receive from the State or to their ability to pay. A tax upon large incomes is justified by the protection which the holders of great fortunes receive from the laws. It is no more "inquisitorial" than is a tax upon personal property or a tariff upon imported dutiable arti

WHAT IS

SCROFULA

It is that impurity in the blood, which, accumulating in the glands of the neck, produces unsightly lumps or swellings; which causes painful running sores on the arms, legs, or feet; which developes ulcers in the eyes, ears, or nose, often causing blindness or deafness; which is the origin of pimples, cancerous growths, or the many other manifestations usually ascribed to "humors;" which, fastening upon the lungs, causes consumption and death. Being the most ancient, it is the most general of all diseases or affections, for very few persons are entirely free from it.

How Can CURED

By taking Hood's Sarsaparilla, which, by the remarkable cures it has accomplished, often when other medicines have failed, has proven itself to be a potent and peculiar medicine for this disease. Some of these cures are really wonderful. If you suffer from scrofula, be sure to try Hood's Sarsaparilla.

"Every spring my wife and children have been troubled with scrofula, sores breaking out on them in various places. My little boy. three years old, has been a terrible sufferer. Last spring he was one mass of sores from head to feet. I was advised to use Hood's Sarsaparilla, and we have all taken it. The result is that all have been cured of the scrofula, my little boy being entirely free from sores, and all four of my children look bright and healthy." W. B. ATHERTON, Passaic City, N. J.

An Important Announcement

About six weeks ago, while at business, I was suddenly attacked with exeruciating pains in my feet, knees and hands. So severe the attack that I took my bed immediately, and in two or three days my joints were swollen to almost double their natural size, and sleep was driven from me. After suffering the most excruciating pain for a week, using liniments and various other remedies, a friend who sympathized with my helpless condition, said to me:

"Why don't you get Swift's Specific and use it. I will guarantee a cure, and if it does not the medicine shall cost you nothing."

I at once secured the S. S. S., and after using it the first day, had a quiet night and refreshing sleep. In a week I felt greatly benefitted. In three weeks I could sit up and walk about the room, and after using six bottles I was out and able to go to business. Since then I have been regularly at my post of duty, and stand on my feet from nine to ten hours a day, and am entirely free from pain. These are the plain and simple facts in my case, and I will cheerfully answer all inquiries relative thereto, either in person or by mail.

25th Annual Session.

THE TWENTY-FIFTH ANNUAL SESSION of Misses Burr & James' School will commence on Thursday, Oct. 4th, at St., John's Chapel, on Third, between Red Cross and Campbell streets, where it has been located for the past two years. The street cars running on Red Cross, a few yards from the building, can cover any objection to distance. A well ventilated schoolroom, pleasant playground, good cistern of water and retired situation make it more desirable than more central localities available.

The Principals, as heretofore, will spare no effort for the advancement of the pupils kindly entrusted to their care, giving individual attention to each, and ruling with firm but loving discipline.

Their many graduates, some of them now occupying the position of teachers, testify to their success. As always stated in their circulars, scholars received only for the session, no deduction Leing made except in cases of protracted sickness. Those entering after october charged only from date of entrance.

MUSICAL INSTRUCTION given by Mrs. M. S. Cushing, whose life-long devotion to the science and long experience in teaching, should be a guarantee for her ability.
