Why is it that so few American women have good complexions?" asked Mrs. Langtry on her first visit to America. Her quest;on can be easily answered. Women are sallow because the blood does not circulate well through their bodies. It does not fill their cheeks with rich color and their eyes with brilliancy. It is "sluggish." What is the result." Bad color, weariness and poor health. What will prevent this? A gentle and pure stimulant that imparts strength, life and good circulation. This is precisely what Duffy's Pure Malt Whiskey does. It is not a beverage; it is a healthy-giv. ing remedy. It is admitted to have done more in making ladies stronger and healthier than any other preparation known to the world. It. and lady workers in the temperance cause, and it has never been known to fail in strength ening, restoring and benefiting A well known

lady, writing on the subject, said: I can never describe the change that has taken place in my appearance and in my feel ings. Instead of feeling tired and 'blue' as i once did, I am now strong and young, both in feeling and appearance. I had a great prejudice against the word 'Whiskey,' but since I have found that Duffy's is indeed a pure and harmless remedy I feel like letting all women

know what a grand help it is." The experience of this lady has been verified in thousands of cases, and an innumerable number of women are kept in perfect heaith to-day wholly through this great remedy. To all purchasers we desire to say: "Be sure and secure the genuine and take No OTHER," It is

the continent from ocean to ocean. hundred. One of the chief problems that Edi son has had to contend with in perfeeting the electric light was the discovery of a suitable material for the loop. He made a long series of costly experiments before he hit upon his carbon filaments, which are the little black thread-like loops which are to be seen inside the little air tight globes. Edison has been satisfied that somewhere in the world there grew a plant or reed or bamboo from whose fibre the perfect filament'could be obtained. He and

his company have spent many thou

sand dollars in the effort to discover

this plant, and at last young Me-

Gowan has found the valuable

bamboo. It seems almost incredible, says the Philadelphia Inquirer, that a person in Philadelphia should hear a band of music playing in New York city, the ringing of her church bells, the whistling of steamboats and the shouts of the populace in the streets as the civic and military processions passed by, and yet this city during the Centennial. She takes press news over the long distance telephone and, in order to facilitate matters and aid her in the news sender at the other end, she wears a metal cap, attached to which is a receiver that presses close the arrival of the President, she dis steam craft, the roar of the artillery artist for the job."—America. tinctly heard the whistles of the and the chime of Trinity's bells. On Tuesday, during the progress of the military procession, strains of music from the various bands and the shouts and hurrans of the witness her ears. These phenomena were repeated during the passage of the civic parade.

A late Chicago sensation is a case of mummification. Wilhelmina Stahl. a young girl, died about two weeks ago. Her mother refused to allow the body to be buried for fear that life was not extinct. The body was kept two or three days on ice and showed no signs of decomposition. Then the doctors began to take an interest in the case. The ice was removed and hot flannels applied. Under all known rules decomposi tion should have set in, but it did not. The body still remains fresh, although the flesh shows signs of drying up. What action upon the body the flannels and artificial heat may have had to produce "mummification" the attending physician would not say, as he had not studied the case thoroughly, but he admitted he was considerably mystified Nothing like it had ever come under his observation before. Under ordinary circumstances decomposi tion would set in after the ice had been removed from around the but; in this instance every natural tors desire to hold a post mortem examination, but this the mother will not listen to.

Intellectual Women.

'I do believe those women, Who for years and years and years Keep polishing their intellects,
