FRIDAY, MAY 31, 1889.

Entered at the Postoface at Wilmington, N.C. as second-class matter.

The Queen's seventieth birthday was celebrated Friday and Satur day with only formal military and lar enthusiasm or even signs of in terest. Her selection of the sculpday honors as a Baronet sends a col chill of rage through the whole English art world. There are num erous foreign born artists in London like Alma Tadema, whom Englishmen cordially like and would delight in seeing selected for marks of dis tinction, but the Austrian who is gins to shoot that a little learning is now made a Baronet is distinctly not one of them. The effigy he made for the jubilee coinage ren dered English modelling a laughing stock to the whole world, and the manner in which for years he has subordinated his own tolerable knowledge of art to the manufac Customer-"Say, waiter, this shad ture of monstrosities which should tastes very fishy." The similar honor given to Prof. Shakes, of Cambridge, the president of the Royal Society, would ordinarily be regarded as proper enough, but his recent election as the Tory member of Parliament for Cambridge University gives a partisan twist to the thing and subjects it to unpleasant

An extraordinary statement is made in a little pamphlet written to show the need for iron, glass or other artificial railway ties, respect ing the number of wooden ties now in use and required annually by the railroads of the United States. It is 396,000,000 cross ties which must be medicine. renewed every six years, [this is probably an exaggeration,] and from this the calculation follows that merely for maintenance of existing lines 66,000,000 ties are required annually. It is further colmaintenance. With such an enormous consumption of wood as these figures indicate, it is plain that a good substitute for wooden ties would be very desirable. Experiments have been made with iron, wood pulp, straw, lumber and even with toughened glass, and whenever the price of wooden ties appreciates or the cost of the substitutes is reduced so as to make it, desirable to use the latter, they will no doubt take the place of wooden ties, but very gradually as the need for repairs arises. The toughened glass ties are the most interesting of the new substances proposed. They have been tried in England and have plenty of endorsements as being superior to iron ties.

Dispatches from Augusta, Me., report that young Mr. James G Blaine, Jr., has once more donned his overalls and is presumably again hard at work in the machine shop to which his father sent him after his flambount career in New York his flamboyant career in New York. Much was made of this at the time the young man thus began to earn a living "at eighty cents a day." He did not then stick to it long, however, for he has been for a month with his father in Washington and spent the last week with the "boys' in New York-touching which stay many stories are told. Meanwhile his young and pretty wife is works ing very hard with Belasco and Frohman, preparing for her debut on the stage next Fall. She is five or six hours a day at her lessonsexercising her voice, learning all the business of the stage, studying various tasks set for her by Belasco and doing exercises in calisthenics meanwhile. She has no desire, it is said, to go upon the stage, but it is a matter of necessity with her. The Blaine family make no accusations of any sort against her, but since the time of her refusal to live with Madame la Mere at the home in Augusta-for reasons which those who know that lady's eccentricities of temper say were amply sufficient -she has received not a cent for the support of herself or her little baby from either her husband or his fam- TWEY CARBONATE OF LIME,

An Important Announcement

About six weeks ago, while at business, I was suddenly attacked with excruciating pains in my feet, knees and hands. So severe the attack that I took my bed immediately, and in two or three days my joints were swollen to almost double their natural size, and sleep was driven from me. After suffering the most excruciating pain for a week, using liniments and various other remedies, a friend who sympathized with my helpless condition, said to me:

"Why don't you get Swift's Specific and use it. I will guarantee a cure, and if it does not the medicine shall cost you nothing."

I at once secured the S. S. S., and after using it the first day, had a quiet night and refreshing sleep. In a week I felt greatly benefitted. In three weeks I could sit up and walk about the room, and after using six bottles I was out and able to go to business. Since then I have been regularly at my post of duty, and stand on my feet from nine to ten hours a day, and am entirely free from pain. These are the plain and simple facts in my case, and I will cheerfully answer all inquiries relative thereto, either in person or by mail.
