The yacht race of the Carolina Yacht Club yesterday, over the regular course at Wrightsville, which was a "ladies' race" and probably the last regular regatta of the season, was one of the most successful, in the way of attendance and interest, that has been sailed this season.

The boats started on time in the order following with a light breeze

#### Turn on the Lights.

The electric lights are in some instances badly placed. There should be more of them or the locality of some of those we now have should be changed. . In several instances they are in low places, instead of on high ones. Lights are particularly needed at the corner of Third and Red Cross streets, as Campbell street makes very near the W. & W R. R., North of Red Cross, and at Front and Red Cross streets, at the approaches to Front Street Depot An electric light at this latter point would also serve to illuminate the Nutt street approach to the railroad yards, as well as the street crossing the tracks.

The presence of the three planets, Venus, Saturn and Mars, and the bright star Regulus in close vicinity, is another interesting fear ture of the month. The autumnal equinox must not be forgotten among the gifts that September holds, for then sun and earth seem to act in heavenly harmony, the earth taking in the sunshine as if it were the elixir of life. One thing only is needed to give the culminating glory to the September nights. It is the harvest moon of the 9th, that rises for four evenings after the full, with only an average differ-Lillian Florence-H. M. Bowden, ence of 27' in the time of rising.
