

THE DAILY REVIEW

VOL. XIII. WILMINGTON, N. C., TUESDAY, SEPTEMBER 17, 1889. NO 220.

Louisville, Ky., has had a big fire in which the losses foot up a million and a quarter.

An English lady has left \$50,000 to be devoted to the photographing of the stars, planets and nebulae.

Thirty thousand out of the forty thousand people of Jerusalem are Hebrews, and the Israelites bid fair to again become the predominant people in Palestine.

Corporal Tanner has yet no successor in the Pension Office. The report that Maj. Wm. Warner had been appointed and accepted was premature. Warner said he didn't want it.

A Troy shirt man predicts that in less than ten years there will be a general return to the old fashioned shirt which buttoned in front, and from which at least one button was missed after every wash.

Archdeacon Farrar's reason for sending his son to be educated as a civil engineer in this country was that our schools are progressive. The Archdeacon says that engineering in England is twenty five years behind that of this country.

As soon as the horse cars from Cairo to the Pyramids are completed, and the work is nearly done, an elevator will be made to the top of the venerable piles, so that ascent may be made quickly and comfortably by the modern traveller.

The tan shoe may have a permanent future after all. One of the results of the recent manoeuvres of the British fleet has been the suggestion that the marines should wear tan or brown shoes henceforth instead of black ones, and brown gloves instead of white.

The French newspapers announce that Anelie Rives and Catulle Mendes, a Parisian writer of fiction, are to collaborate a novel together. The possibilities involved in the fusion of Rives and the French should be sufficient warning to the public to stand from under.

Throughout Italy the principal towns are one, after another, providing buildings for the treatment of hydrophobia according to Pasteur's system, and the municipal council of Rome has lately decided to devote the necessary sum of money in furnishing a Pasteur institute there.

Fifteen hundred and fifty eight million letters or forty one per head of population, were delivered in the United Kingdom during the year which ended on the 31st of last March. Besides that there were 800,000,000 postal cards, newspapers, and parcels. The telegraph service showed a deficit of £240,000.

A race war has been threatened in Lawrenceville, Ill. There was an arrest of a colored man and an attempted rescue by his friends. A pitched battle ensued and the whites were victorious. The latter were led by Judge Barnes and he showed a pile of pluck. This and the fact of his name leads us to believe that he was born in North Carolina.

If Mrs. Harriet Coe, of Grand Rapids, Mich., lives until January 11th, 1890, she will be 103 years old. She was born in Hartford, Conn., in 1787. Her father, Alexander McNeill, was a soldier in the war of 1812, and her grandfather, General McNeill, was a soldier in the war of the Revolution. In her 100th year she had a paralytic stroke, and it was thought she could not recover, but she did, and is now in a fair state of health.

The popular Crusus of Spain has just died in the person of the Marquis de Urquijo. His executors have paid into the Spanish treasury succession duties amounting \$96,000 on his fortune, which exceeds £5,000,000. This was gained in fifty years. The owner had begun life as a Basque village lad and died a Senator, grandee, and ex-mayor of Madrid. He left \$180,000 in bequests to charities in his native province, many of which he founded himself, and \$20,000 for masses for himself.

The shell road is now in a splendid condition, as smooth and as level as a billiard table. There isn't a nicer drive in the United States. We counted twelve vehicles on it yesterday afternoon, in a distance of less than two miles.

Mr. T. G. Wilkinson, of Columbia, S.C., a graduate of the University of South Carolina, is expected here within a few days to take the position of Assistant General Secretary of the Young Men's Christian Association.

All the members of the Young Men's Christian Association are urged to attend the regular monthly business meeting this evening at 8.15, at the rooms. In addition to the usual business, matters relative to the new building will be discussed.

Opera House To-Night.
Don't overlook the attraction at the Opera House to night. It is the first performance of the season and should be greeted by a good house. Miss Herndon comes to us well endorsed and it is said that she has a fine company to sustain her. Our exchanges tell us that the play is a very interesting one. These things lead us to believe that a pleasant evening will result to all who see the play.

The farmers and others friendly to the cause are requested to bring basket dinners. Prof. B. F. Grady, of Duplin, will be the principal speaker. Other speakers also will address the assembled crowd. Good music will enliven the occasion and there will be dancing in the evening and at night. A large attendance and a good time may be expected. Under the lead of its able President, Dr. K. J. Powers, the South Washington Alliance is in a flourishing condition and is doing much good. Mail trains going North and coming South will stop at Willard on that day.

Audit and Finance.
The Board of Audit and Finance met yesterday and audited and approved bills as follows: For current expenses, \$446.76, notes \$25,000, interest on same, \$363.75. Mr. R. J. Jones, chairman, Mr. Wm. Calder and Capt. W. R. Kenan, were present at the meeting.

On to Onslow.
Capt. Phil Sasser, of the W. O. & E. C. R. R., who was in the city yesterday, tells us that the road is now graded to Scott's Hill, 12 miles from the city, and the force is at work two miles beyond that point. It is understood that the iron for this road has been ordered and it is expected that track laying will be begun at an early day.

Grape and Banana Hulls.
The grape hull nuisance is unabated. There is no ordinance on the subject, so far as we can ascertain. We have been hammering at this thing for years past but one Board of Aldermen seems to be about as indifferent as another. We have seen a lady slip on a banana peel and fall to her knees. It is all right, though, gentlemen, or it will be until somebody slips and receives a serious injury and the city will probably have to pay the piper.

Rapidity and Solidity.
Mr. Frank Williams, Paymaster on the Carolina Central Railroad, while on his last trip up the road took a number of photographic views of the road where it was so broken by the recent cloud burst. No one who has not noted the ground attentively can at all understand how serious the disaster was nor the amount of labor necessary to put the road in good order again. In all there was 1,750 feet to repair and 1,350 feet of this was trestle work. Capt. Whisnant was on the spot all of the time, day and night and he has been complimented by many on the rapidity and solidity of the work. It required about a week to do all of the work but in one place 200 feet of the trestle was repaired in 24 hours.

Fire at Maple Hill.
We regret very much to learn of the destruction by fire of the residence of Mr. Gibson James, at Maple Hill, in Pender county, on Thursday last, on the morning of that day, about 2 or 3 o'clock. Mr. James was aroused by his wife's screams and awoke to find the house in flames. They rushed from the house with the children and their calls for aid brought to their assistance a number of tenants on the place, most of whom are colored. These latter were just returning from a meeting and they worked valiantly. It was soon apparent that it was too late to save the house and so all of the furniture except that in the kitchen was saved. But the house was a total loss. We do not know that there was any insurance. Mr. James estimates his loss at \$1,200 and will rebuild as soon as he can get the lumber.

Political Note.
Our esteemed contemporary, Cabman Jones, informs us that he cannot support our nominee, the mosquito, for the dignified office of national bird. He says the mosquito does not soar high enough. Indeed, he says that he has lived in countries where mosquitoes filled the air chock full down near the earth, yet on going up fifteen feet above the ground he always escaped them. The Post is not an organ. It means to be fair to all parties, and it must say that Cabman Jones, if his testimony be accurate, has presented the only real argument we have heard against the mosquito. Surely this proud nation will not accept for its bird one that never flies higher than fifteen feet from the earth. However, before we forsake the mosquito we mean to obtain, if possible, the evidence of somebody who has slept in a second or third story room without a mosquito net over his (or her) bed.
Nota Bene—Mosquito Nets which will last for several years for sale at No. 17 Princess street by W. M. Cumming. Mr. Cumming also renovates old Mattresses and makes them as good as new. †
