Catarra.
Catarra is a most disgusting ailment and yet many unnecessarily suffer from the disease. They will try local applications, which do no good whatever, but fail to try such constitutional treatment as is afforded by a use of B B B (Botaic Blood Balm), which removes the mucus poison in the blood and thus eradicates the cause of the disease.

N. C. Edwards, Lumpassas Springs, Ga., writes: "I was greatly annoyed with catarra which impaired my general health. The discharge from my nose was very offensive, and I used various advertised remedies without benefit until finally the use of B B B entirely cured me. I am proud to recommend a blood remedy with such powerful curative virtue."

B. C. Kinnard & Son, Towaliga, Ga., writes: "We induced a neighbor to try B B B for catarra, which he thought incurable as it had resisted all treatment. It delighted him and continuing its use he was cured sound and well."

HE-NO TEA—FREE.

"Exaggerated claims in many advertisements have made people tired. This recent saying has the right ring and we accept its suggestion. We are the importers of HE-NO TEA. We propose increasing its sale in Wilmington. Not by praising it, but by giving you, free of all cost, enough HE-NO TEA to last a week. The proof of the pudding is in the eating." An old sage which suggests another, "A word to the wise is sufficient."

Send us a postal card with your address, and, for a limited time, we will mail any one in Wilmington, free a package of HE-NO TEA, and an interesting book about tea. You risk a postal card. We risk your liking the tea so well that you will continue to use it. If you do not we make a loss. Thus we show our confidence in the merits of HE-NO TEA.

A Wonderful Cannon.
In process of construction at the gun factory in Watervliet is a 10-inch gun, which, when completed, will be one of the greatest caliber and most wonderful in its design ever made in this country. This huge gun will be built according to Capt. Crozier's latest design of wire winding. Capt. Crozier is located in the ordnance department at Washington, and the present gun is the fourth of its kind in existence. The work of boring the gun has been completed, and it will be placed in the lathe preparatory to commencing the wire winding.

The square wire to be used will be of steel, as is also the gun proper, a tenth of an inch in thickness and will be wound from the breech to the muzzle the entire length. To produce the desired work a dynamo has been placed in the gun factory, which will be utilized to weld the ends of the wire by electricity. When completed it is expected that this gun will throw a 500 pound projectile from twelve to fifteen miles, the greatest distance yet accomplished. The weight of the powder charge will be about 230 pounds, and the penetration will be, it is expected, about twenty-four inches in armor plate.—Albany Argus.

A Belfast Youth's Experiment.
One of our young men asked his father for the horse the other evening to go to Northport. But the old gentleman allowed that he and his wife would go themselves, and soon after did go, leaving behind a mad young man. But he finally hit upon the idea of harnessing up the cow. This he did into the best buggy. The cow was very docile until he tried to drive her. When she felt the weight of the wagon attached to her she gave one bellow full of fright, and with tail over her back she ran kicking and plunging through the garden, tramping the vegetables and knocking down bean poles, the young man clinging on to the seat, howling for some one to stop her.

But nothing could stop her. Finally a stone wall got in her track and she cleared it in grand shape; but the buggy, young man and harness were so badly mixed up that a neighbor who came to the rescue could not tell one from the other. The cow has not yet been seen, but the ruin she left behind will forever be a monument to her wrath. The buggy was carried to the barn in a bushel basket and the young man on a stretcher.—Belfast (Me.) Age.

Outsman at Harvard.
I noticed the other day in the papers an item about Harvard college which, if not an error, is a striking indication of the growth and magnitude of the athletic spirit there. It was to the effect that eighty members of the freshman class are candidates for their class crew. What a change is this from a period even so late as fifteen or twenty years ago, when (at least so I understand from the graduates of about that period) a dozen men would be about the number of freshmen who had this commendable ambition. Of course the classes have grown since then, but in nothing like a similar proportion. I, for one, am not alarmed by the athletic tendencies of the modern student. I have seen so many intellectual men hampered all their lives by want of vigor, and so many commonplace men succeed by dint of nervous energy and nervous composure, so to say, that I don't care how much time the boys spend in cultivating their muscles and their physique.—Boston Post.

No Change.
W. W. Welling, stamp clerk at the postoffice, is very popular with the public, and his return to duty after a few weeks' absence recently was hailed with satisfaction by many. Mr. Welling has an impediment in his speech. Shortly after his return a well known business man came to the window for some stamps. Mr. Welling tore off a sheet and threw out the change in his usual brisk manner.

"Well, I see your right hand hasn't forgotten its cunning," remarked the patron.

"No," responded the clerk, without changing his expression, "b-b-but my t-t-tongue still c-c-cleaves to the r-r-roof of my m-m-mouth."—Indianapolis Journal.

Full Fare for the Corpse.
On a train from Aurora to Chicago the other day a strange incident occurred. A poor man, accompanied by three children, was bringing the corpse of his wife to the city. He was provided with a ten-trip ticket, and said he had been told by the station authorities at Aurora that the fare for himself and children and the body of the wife could be punched from the trip ticket. The conductor insisted upon full fare for the corpse, and intimated that if he did not get it he would have to put the body off. A disinterested passenger thought the man had sufficient sorrow without being compelled to argue with the conductor, and paid the fare.—Philadelphia Ledger.

Weather signs conflict this year with the usual regularity. A covey of partridges took shelter in a Norristown outshed, and the prophets predict a cold winter on the strength of the visitation. A swarm of bees have culled up a home near the top of a Sunbury oak tree, and the prophets predict a mild winter.

The Advantages We Offer to

PIANO AND ORGAN

CUSTOMERS ARE. THAT OUR INSTRUMENTS ARE CAREFULLY SELECTED BY THE UNDERSIGNED AND BOUGHT DIRECTLY FROM THE MANUFACTURER. We have a very large stock, comprising all grades and styles, to select from. All our Pianos are delivered and kept in tune the first year by two competent tuners. As we are right here, we are responsible, which is not the case when you send for Pianos or buy from travelling agents, for when any thing is wrong you may have a guarantee but this does not repair your instrument. By economical management we can sell you instruments at least 20 per cent. lower than you have to pay to travelling agents, for you have to help pay their heavy expenses.

The instruments you buy from us are right here and consequently you do not buy the "cat in the bag."

Over 200 Instruments sold in Wilmington alone is the best proof that the public have confidence in our judgment and integrity.

Scribner's Magazine For 1890.

THE PUBLISHERS OF SCRIBNER'S MAGAZINE aim to make it the most popular and interesting of periodicals, while at the same time preserving its high literary character. 25,000 new readers have been drawn to it during the past six months by the increased excellence of its contents (notably the Railway articles), and it closes its second year with a new impetus and an assured success. The illustrations will show some new effects and nothing so noble as SCRIBNER'S MAGAZINE attractive and interesting will be neglected.

THE RAILWAY ARTICLES will be continued by several very striking papers; one especially interesting by Ex-Postmaster General Thomas L. James on "The Railway Postal Service." Mr. ROBERT T. STEVENSON'S serial novel "The Master of Ballantrae," will run through the greater part of the year.

A CORRESPONDENCE and collection of manuscripts relating to J. F. Millet and a famous group of modern French Painters will furnish the substance of several articles. Illustrated.

The brief and pointed written last year by Robert Louis Stevenson, will be replaced by equally interesting contributions by different famous authors. Mr. Thomas Bailey Aldrich will write the first of them, or of the January number.

Many valuable LITERARY ARTICLES will appear; a paper on Walter Scott's Method of Work, including a critical original MS., a second "Shell of Old Books," by Mrs. James T. Fields and many other articles equally noteworthy. Illustrated.

Articles on ART SUBJECTS will be a feature. Papers are arranged to appear by Clarence Cook, E. B. Blashfield, Austin Dobson and many others. Illustrated.

A FISHING ARTICLE, describing sport in the best fishing grounds will appear. Sumner Winnish, Bass and Tarpon are the subjects now arranged. The authors are well known sportsmen. Illustrated.

ILLUSTRATED ARTICLES of great variety, touching upon all manner of subjects, travel, biography, description, etc., will appear, but not of the conventional commonplace sort.

Among the most interesting in the list of scientific papers for the year will be a remarkable article by the Rev. Professor Huxley, upon the most recent developments and uses of PHOTOGRAPHY. Illustrated.

A class of articles which has proved of special interest will be continued by a group of papers upon ELECTRICITY in its most recent applications, by eminent authorities; a remarkable paper on DEEP MINING, and other interesting papers. Illustrated.

A SPECIAL OFFER to cover last year's numbers, which include all the Railway Articles, as follows:

A year's subscription (1889) and the numbers for 1888.....\$4.50

A year's subscription (1889) and the numbers for 1888, bound in cloth.....6.00
