VOL XIV

WILMINGTON, N. C., MONDAY, NOVEMBER 10, 1890.

NO 281.

The Democrats have a majority of at least four in the New York legislature and will elect the Senator.

Lost, strayed, or stolen — "A bloody shirt." The finder will please let the fact be known. Address B. Harrison, Dead Letter Office.

The majority in this State will not be far from 45,000, which is enough and to spare. The returns are not yet all in, however, and it may possibly reach 50,000.

The Republicans are trying hard to concoct some plan by which they can steal the New Hampshire legislature but the Democrats there are wide awake and will hold on to all they have got.

The highest estimate we have yet seen of the majority in the next House is in yesterday's *News and Observer* where it is put at 157. This is straining the thing a little. We do not think that it will be more than 150, if it reaches that figure.

Ben Butterworth, of Ohio, was smart. He saw the handwriting on the wall and promptly stood from under, declining a renomination to Congress. Otherwise he would have been sweetly slaughtered with the other lambs of the Republican fold. Ben denounces the tariff but he voted for it — allee same Melican man.

Russell & Co. manufactures agricultural implements at Massillon, Ohio, and are at the same time rabid Republicans. They have reduced the wages of such of their employees as voted the Democratic ticket 33 per cent. simply and solely for that reason alone. They have a large trade South.

For the first time since the war the Northern, Eastern and Western States elect more Democrats than Republicans to Congress. There are sixteen States in which the Republicans have no Congressmen at all for the next House and two of these are the old abolition States of New Hampshire and Rhode Island.

It was rumored on Friday last that Hon. John Wannamaker was "busted," financially, politically and teetotally. The report was only partially true. Politically, John has gone to the demimion bow-wows and financially it is said that he isn't as well off as he used to be before he began bucking against Jay Gould in Wall street.

"It's a valiant flea that dare eat his breakfast on the lip of a lion" and we once thought it took a darning man to go into a damp, swampy country, even for his own advantage. But he knows now that pain is killed by Salvation Oil and he is not afraid of rheumatism.

**A New Process in Farming.**  
We understand that Mr. H. R. Kuhl, of Federal Point township, has discovered a process in farming by which, with the expenditure of a small amount of money the productiveness of any land can be increased three-fold. He has experimented with it for several years and is satisfied that it will do all that is claimed for it. He has here to-day potato tubers raised by this process which were planted in August last, on land on which watermelons had been grown this year. Mr. Kuhl proposes to patent the process.

There are 33 regular members, 52 advisory and corresponding members, a board of 15 trustees, 19 regular officers and traveling secretaries, and a corps of special agents, all of whom devote the whole or a portion of their time and efforts to the work that is being prosecuted by means of visitation, correspond-

pendence and publications (over 100,000 copies of fifty small suggestive pamphlets, concerning work for young men, are issued annually) to help and strengthen the state of local organizations in all parts of North America, and in the special supervision of the college, railroad, German and colored departments. By instructions of the Philadelphia Convention, the Committee has undertaken work for young men in foreign mission lands. It already has a secretary stationed in Japan and another in India, the expense of this foreign work being provided by special funds.

The growth of the work during the past twenty-four years — a growth largely due to careful supervision by the International and State Committees — has been remarkable, as the following comparisons will show:  
In 1866, there were less than 100 Associations, with a membership of not more than 15,000; now there are 1,341 Associations, with a membership of 213,000.

Then, there was one Association Building, valued \$11,000; now, there are 205, worth \$3,352,910.  
Then the total net property amounted to \$90,000; now, it amounts to over \$10,400,000.

Then, there was less than a dozen young men giving their entire time to the work; now, there are 1,095 secretaries and assistants.  
Then, there was less than \$50,000 contributed annually for local, and only \$522 for general (International and State) work; now there is over \$1,600,000 given yearly for the former purpose, and \$162,000 for the latter purpose.

Then, there was nothing done for special classes of young men, such as college students, railroad employees, &c.; now there are 303 College Associations, 82 Railroad Associations, 10 German Associations, 36 Colored Associations and 11 Indian Associations.

The following additional statistics show the present condition of Association work along other lines, being in every instance a very large increase since 1866:

There are 1,031 Bible and Bible training classes for young men only; 1,537 weekly prayer, gospel and praise meetings for young men only; 4,919 lectures and entertainments, and 3,269 sociables given annually; 17,143 different students in the educational classes; 511 libraries, with 422,912 volumes; 731 reading rooms; over 50,000 visits to the rooms daily; 368 gymnasiums; 145 literary societies; 3,554 situations secured annually; 178 boys' department.

The entire cost of the extended work of the Committee (including salaries, traveling expenses, publications, etc., but excluding the expense of the foreign work) was, during 1889, \$50,683. The Convention at Philadelphia authorized and directed an enlargement of this work calling for \$65,000 annually. For this amount the committee is dependent upon voluntary contributions.
