Conference then adjourned sine die at 10 o'clock P. M.

EVIDENCE THAT THE SOUTH IS STILL FOR A LOW TAR-

A correspondent of the New York Herald who has been visiting the chief industrial centres of the South is surprised to find-what The Sun long ago asserted—that Southern capitalists in becoming manufactu-rers remain too clear-headed to become protectionists. The fallacies of protection are exposed in every textbook used in the universities and colleges of the country, and the pos-sessors of large wealth in the South are still in the main well acquainted with economic topics, and little likely to wish to impose on themselves the suicidal policy of high tariff rates for the purpose of miscalled "pro-fection." Senators Brown of Georgia and Butler of South Carolina did, it is true, last winter express themselves in favor of that policy. These gentlemen were naturally supposed to reflect the wishes of their constituents and to indicate a radical change of sentiment as regards the tariff throughout the South. That, however, the true sentiment of that section favors, a large reduction instead of the maintenance of the present tariff rates is abundantly proved by the testimony, brought by the Herald's correspon-dent. South Carolina has cotton mills counting about 120,000 spindles, located mainly at Graniteville, Vaucluse and Langley. The stock in them is held for the most part in South Carolina and Georgia. Mr. H. Hickman, president of the company owning the mills at Vaucluse and Graniteville, on being questioned declared himself "in favor of an absolute abolition of the tariff on cotton goods, were that possible." His reason was simple and conclusive: "We successfully compete with the English manufacturers in their own markets-in China and Brazil. One-third of our product is exported. Could we buy our machinery at less cost—which we could of course do under a lower tariff—and secure for Unequalied array of German gems.

Bad Reath: Rain in the Side, sometimes the pain is felt under the Shoulder-blade, mistaken for Rheumating; general loss of appetite; Bowels and the state of appetite; Bowels and t Rheumatsm: general foss of appetite; Bowels generally costive, sometimes alternating with lax; the head is troubled with pain, is dull and heavy, with considerable loss of memory, accompanied with a painful sensation of leaving undone something which ought to have been done; a slight, dry cough and flushed face is sometimes an attendant, often mistaken for consumption; the patient complains of weariness and debility; nervous, easily startled; feet cold or burning, sometimes a prickly sensation of the skin exists; spirits are low and despondent, and, although satisfied that exercise would be beneficial, yet one can hardly summon up fortitude to try it—in fact, distrusts every remedy. Several of the above symptoms attend the disease, but cases have occurred when but few of them existed, yet examination after death has shown the Liver to have been extensively deranged.

It should be used by all persons, old and young, whenever any of the above symptoms appear.

Persons Travelling or Living in Un-healthy Localities, by taking a dose occasion-ully to keep the Lives in healthy action, will avoid all Malaria, Billious attacks, Dizziness, Nau-sea, Drowshiess, Depression of Spirits, etc. It will invigorate like a glass of wine, but is no in-toxicating beverage. "The only Thing that never falls to Relieve."—I have used many remedies for Dyspepsia, Liver Affection and Debility, but never have found anything to benefit me to the extent Simmons Liver Regulator has. I sent from Minnesota to Georgia for it, and would send further for such a medicine, and would advise all who are similarly affected to give it a trial as it seems the only thing that never fails to relieve.

P. M. JANNEY, Minneapolis, Minn. Dr. T. W. Mason says: From actual experience in the use of Simmons Liver Regulator in my practice. I have been and am satisfied to use and prescribe it as a purgative medicine.

Mr. Hickman that the cotton factories of the South, as well as the producers of cotton, would be greatly efited by the total abolition of all tariff duties. Mr. Charles Estes, President of the Board of Trustees of the Augusta Water-Power Canal, and president also of a company which is now building at Augusta a cotton mill at a cost of \$1,000,000, not only favors "the abolition of all duties on cotton goods," but pro-tests that but for "the additional cost of \$100,000 entailed by the tariff on the purchase of our machinery we could have had that amount to put into additional looms, or to add to our working capital." The same gentleman declares the tariff "a positive clog upon the development of our cotton manufacturing industries."
Mayor Courtenay, of Charleston,
South Carolina, who is largely interested in cotton -manufacture as well as iron, favors the largest modification possible in the tariff, and thinks the vote of his State would be "overwhelmingly against protection." General Phillips, who is building a railroad in northeast Georgia, leading to iron and coal mines, though himself in favor of protection, says: "The fact is, the cotton growers of the South need protection against protection, our protection policy having led to the fostering of the East Indian cotton erop by England. The cotton, corn and grain interests of Georgia so vastly outweigh in importance its mineral and rice interests that our State must always be in favor of the utmost freedom of trade." Other north Georgia iron men are of opinion that a reduction of the tariff on iron would materially help them, as competitors of Pennsylvania iron men. Mr. Hillman, President of one of the largest pig-iron manufacturing establishments at Birmingham, Ala., states that the average cost per ton at his furnace last year, including all charges, was \$12.43. The Pennsylvania iron masters declare that they must blow out their furnaces if the price falls below \$21.50 per ton, the cost of its manufacture being estimated at from \$18 to \$19 per ton. Hence the easy argument is made that the Alabama iron, with an average freight charge of \$4 or. \$5 per ton, can to-day undersell Pennsylvania iron; much more would it do so if the Pennsylvania manufacturers were no longer protected. Summing up the conclusion s that South Carolina, Georgia and Alabama will remain free trade in

sentiment.

Some advocate its total abolition ith the loss of \$126,000,000 annual-With due deference to the opin ion of our Democratic friends, we think that now is not the time for its total extinction and a total loss of \$126,000,000 to the Treasury. It will not be conducive to the interests of the Democrats to remove at once the whiskey tax. Let the whiskey tax remain. It is a luxury, and whiskey as now used is too often a curse to America, and the whiskey drinkers do not demand its removal We prefer to have the tariff reformed and the whiskey tax reduced. Let our import taxes on the necessaries of life be removed. For the revenue men we have no love. Let them go into private life, and let sheriffs col-lect the whiskey tax. Let the tax be reduced and the present mode of collection be changed.

Weldon News. The revenue system should be remodeled and the tariff reduced, but neither should be totally wiped out at once. The whole question re-quires good financiering, and unless it is disposed of in an equitable way the people will disapprove.

CURRENT COMMENT

- The taxes on whiskey, beer and tobacco are the easiest paid of any, because every dollar paid by the consumer goes into the treasury, whereas the object of protective taxes is to make the consumer pay the home manufacturer higher prices for domestic articles, without yield-ing any revenue.—Cincinnati Gazette, Rep.

- Virginia desires that the internal revenue tax upon tobacco shall be removed, in order that the amount of that tax, which is now paid by those who chew or smoke tobacco, shall pass into the hands of the tobacco growers and manufacturers of Virginia. Pennsylvania is quite willing to allow Virginia to plunder the people in this way, if Virginia, in turn, will help Pennsylvania rob the people by means of a high tariff.— Charleston News and Courier, Dem.

But it is true. Mr. Kelley is not a protectionist in the sense of protecting all domestic capital and labor against the competition of for-eign capital and labor. He is a protectionist only in connection with not protecting, but enriching at the consumer's expense, a few gigantic mo-nopolies. He is the especial sup-porter of the ships of John Roach, which drive American commerce from the ocean, and of the steel of the Bessemer steel monopoly, which declares annual dividends of seventyseven per cent. He is in Congress the supporter of every special in-terest which amasses annually enor-mous fortunes from the tariff.— Philadelphia Telegraph, Rep.

of their own markets. As it is, we make a better class of goods at a not greater cost than the English mills."

Mr. Hickman's statement is borne out by the fact that the last report of the net profits of the Graniteville Mills put them at nearly 30 per cent. of the capital invested. Mr. G. H. Phinizy, President of the Georgia Railroad, and also of the Augusta Cotton Mills, the largest factory of the DITSON & CO., Boston.

This Oil is abstracted from peculiar species of small White Shark, caught in the Yellow Sea, known as Carcharddon Rondelett. Every Chinese fisherman knows it. Its virtues as a restorative of hearing was discovered by a Buddhist Priest about the year 1410. Its cures were so unmerous and many so seemingly miraculous, that the remedy was officially proclaimed over the entire Empire. Its use became so universal that for over 300 years no deafness has existed among the Chinese people. Sent, charges prepaid, to any address, at \$1.00 per bottle.
