CAPE FEAR RIVER IMPROVE-MENTS.

The storm of the 25th and 27th of August, was not very severe along the coast in the vicinity of our river. Yet we have been informed that it did considerable damage to the U.S. improvements of the Cape Fear inlet. The fact is a great many of our people have come to the conclusion that considerable money is being expended without correspondingly benefitting our harbor. Some believe it is 'for the want of good judgment on 'the part of the officers in charge. We are free to say that the matter ought to warrant a thorough investigation by the higher officials of the government. A work that has already cost \$1,200,-000, and bids fair to cost as much more, should have an officer in charge of the highest integrity and capacity. This the people of Wilmington have a right, to expect and demand, and we have not the least doubt but what the able Chief of the Engineer Department will give the proper consideration to this importent matter, and relieve all grounds for further complaint on the part of our

people.
