THE NEWS AND OBSERVER, APRIL 8 1897.

transactions were almost wholly lacking n interest, the volume being small and the fluctuations narrow. The total sales for the day numbered only a few thousand shares over 100,000 and nearly half of these were of sugar. Sales of all the granger stocks aggregated only about 16,000 shares and the coalers only about as many more, of which 10,000 were of New Jersey Central. Speculation in railroad shares has practically come to a standstill after the recent flurry due to the Trans-Missouri decision and the fear of its effect. These fears seem to have abated in large part but prices have not recovered their former level and there is no demand manifest to carry values upward. Prices held fairly firm to-day, however, in spite of the dullness. The application for a rehearing of the Trans-Missouri case had a strengthening effect though it was not taken very seriously (nto account. The new government fours rose 1/2 to 1243% on light sales with out eliciting any large offers. Railway bonds participated in the semi

stagnation that was evident in other departments. The aggregate sales were on-ly \$787,000. Changes were trivial and firmness prevailed.
