## FOR THE FARM AND HOME.

Increasing the Size of Apples.

A correspondent of the Maine Farmer says: "Among my native trees was one which yiel 'ed a large crop of small apples every alternate year. They were of a fine flavor, but so small in size that they were worthless for marketing. To cause them to increase in size I to inned out the small branches after the fruit had formed, taking off about half the fruit. On gathering the apples from this tree in the fall I found them nearly double the size of previous years and about the usual quantity in bushels. I also found the tree Hossomed abundantly the ensuing season, and by picking off about half the fruit when about the size of gooveberrica, the tree yields fruit every year."

### Water Cress.

# Points in Contrast.

Hishop tlack says there are some our nature and that of the brute, and the resemblance might be found to pose. It is among the dumb animals that our language finds the symbols the lamb and the lion, the ox and the tiger, are synonymous with innocence and conning, gentleness and power. patience and ferocity. The most vigo ous epithets, both of henor and contempt, are taken from this source. The Bible is full of them; "Go and tell "I preserve my equilibrium under all that for" - "Ye serpents, ye generanot back"- "I am like an owl of the desert"-on the one hand, and on the other we have an imagery drawn from animal life, which is too sacred to be unoted in this connection.

## A ROMANTIC STORY.

How a Brother and Si-ter, Long Sep-crated, Found One Another In August last, a young man of geneel appearance applied for work as a farm hand at Mr. James Paign's, of Franklin county, Ohio. He called himself John Hammond, and said he was from West Virginia, near Wheeling,

He was intelligent, and in dress and appearance rather above the ordinary farm hands, and about twenty-two years of age. Mr. Paign was much pleased with his address and appearance, and employed him until after He soon observed a

which Hammond consented, remarking that he had not found a place so much like home as the home of his ton, N. J., accepted a poculiar wager employer. The resemblance referred from a dry goods merchant of that to was a frequent subject of conversatown. The merchant agreed to give tion between Page and his wife. One them cach a silk dress it they would evening, recently, they were all sitting drive two logs he wanted killed from around the fire. Paign was playing with his two little children, Young Hammond was reading the Bible-a house. The offer was made in Jan., thing sputs usual for him while about but, much to his surprise, the toning the house and not otherwise employed.

> He asked Mrs. Paign, with a suprisof look, is that was her name.

"Yes, he said, "that is my true name; but now a lepted father's name

"Well, said he, "that is my name too John Hum, but I was raised by nothing easier to raise. Stick some cellent sheef and fried after it, has Abstrata, Whether or not it will Mr. Hammond. The legend runs the table, and even attached to the thus: There were in times of old, rions in treating the discuss, and had heads of some of the leads for those, many mesons ago, two huge feathered is dangerous for young here, and been very some soful all the ugh the who desire to burn the midnight monsters permitted by the Manitou to descend from the sky and alight on the banks of the Seneca river. Their form was exactly that of the mesquite, They were so large that they darkened the sun line a cloud as they few toward the earth. Standing one on eith er bank they guarded the river, and stretching their long necks into the canoes of the Indians, as they attempted to paddle along the stream, gobbled them up, as the stork king in the table gobbled up the frogs. The destruction of life was so great that not an Indian could pass without being devoured in the attempt. It was long before the monsters could be exterminated, and then only by the combined efforts of all the warriors of the Caynga and throading a nations. The battle was Hall's Balsam very extusively inhis practice, terrible, but the warriors finally tri-mander, and the mammoth moreonic stored to health by the use of this invaluable. umphed, and the mammoth mosquitees were slain and left unburied. For this neglect the Indians had to pay dearly. The carcasses decomposed, and the particles, vivilled by the sun, flew off in clouds of mosquitoes, which have filled the country ever since

Leve your friend with his faults.

The Star of Bethlehem.

Mr. Frank Gilbert, in his new "Worlda Ristorical and Actual," quotes the learned Professor Gomming as follows. In 1887 the "Star of Bethlehem," will be one more som in "Cleopatra's Chair," and will be accompanied by a total oclipse of the sam and moon. The star ouly makes its appearance every 315 years. It will appear and illuminate the heavens, and exceed in brilliancy even dupeter when in opposition to the sam, and therefore near to the sam and brightest. The maryclous brilliancy of the "Star of Bethlehem" in 1887 will surpass any of its previous visitations. It will be seen even by morehay, shining with a quick flashing light the entire year, after which is will gradually decrease in brightness and first dividence and first dividence and the attention of modern astronomers in the year 1345. It was then called a new start. It was no mow star, however, for this was the star that illuminated the heavens at the nativity of Christ.
