Tea Culture.

From the first, singular mistakes have From the first, singular mistakes have been made in regard to tea culture in the South. Some twenty-five years ago the show whether the Chinese tea would grow in the South and they sent an agent to China to get seed. At that very how the four the track we conserve and the track of the track we can agent to China to get seed. At that very how the south and they sent an time, hundreds of tea trees were growing in the South, producing seeds, and nur-serymen were rationg plants for their trade both from these seeds and from

trade both from these seeds and from cuttings. Any nurserynam could have fold the government that the tea plant would grow very well in the South, and on a year's notice, could have furnished, under contract, as many plants as desired for distribution. But the seed came, don't were relied and distributed every.

It is a wonder the American hog has not seen accused of causing the cholea in Europe plants were raised and distributed every where, and that was about the last of it. During the last few years, the govern-ment again tried its hand. Again it did

of appeal to nurservinen or tree growers

and appeal to furserymen or tree growers of experience, and again we have the result in the aunoancement that it 'cean't 'be done.' Now this is all nonsense, the tea plant has been grown successfully, its many parts of the South. Tea has been made rean the leaves as good and as cheap as the Chinese ever make. Let the government give but a bounty—pro-tection. If you like to call it—for a few years for private outerprise, and we will years for private enterprise, and we will guarantee the success of the Chinese tea elant as a ter predict in America. "Nick" in the Bud." Sad to say, many a good thing attrains to nothing more than a fair beginning. On the other hand it is a matter for congravitation that the growth of score will things may be also promptly frustration.
