

LOCAL RECORDS.

Mr. Hiram T. Chapin, of this place, departed on last Tuesday for the Louisville (Kentucky) Medical College, where he will pursue his medical studies and obtain a doctor's diploma.

Bynum and Headen have just received their stock of Fall and Winter goods, consisting of all the varieties generally found in a first-class store. Cover and Orchard Grass Seed on hand.

Our huntsmen can now indulge in their favorite sport without fear of the law, as the law prohibits hunting certain game only between the 1st of April and the 15th of October. Partridges had better now squat low!

The storm of last Monday was equal to any equinoctial storm that we have ever known. The rain poured down in torrents and the wind blew with much violence, making it very disagreeable to those who were exposed to it.

W. F. Womack & Bro. have enlarged their store at Siler Station, and have received their Fall and Winter stock of Goods which will be sold as low as can be bought elsewhere. The highest price paid for flour, cotton, &c.

If you want to be well dressed at a small expense, call on Sammie Brown, Greensboro, leader in low prices and reliable goods, and look at his line of Clothing, Shoes and Hats; and don't forget to remember that Brown carries the largest stock of Ladies' Cloaks and Wraps in the city.

Ladies, if you need a nice Cloak or Wrap you will find at London's a splendid stock, consisting of Coats, Walking Jackets, Russian Circuits, New Markets, Jerseys, Shawls, &c. It will pay you to give him a call before you buy. London has a large stock of Hats, Bonnets and Hoods which can be bought cheap—money goes a long way now.

When you go to Ore Hill stop at the Big Store nearest the railroad, where C. C. Clark has one of the largest and cheapest stocks of Goods ever brought to Chatham. He will sell anything you want, and buy anything you wish to sell. His goods were bought with great care, and he offers special bargains.

A few of those nice dresses left at London's. Ladies are buying them very fast; you had better call on us in London, as we have the best 50 cents Corset you ever saw; has a nice stock of Goggles very cheap; the cheapest Handkerchiefs ever seen in this market. London has the largest and cheapest stock of Ready-made Clothing you ever saw in this county.

Former Post Justice, Manly Backer, of Hadley township, was bound over for trial at the Federal Court, now in session at Greensboro, upon the charge of illicit distilling, and also to our superior court upon the charge of burning the barn of J. E. Perry Esq. As he could not appear in both courts at the same time, he was bound not to appear at either, and he did not.

Our Post Office.—We hear that Mrs. Palmer has forwarded to the Postmaster General her resignation as postmaster at her residence. She has held that office for eight years and has made a most efficient officer. The editor of the Record has the largest mail that is received by any one person at this place, and he takes pleasure in thus publicly testifying to the efficiency and courtesy of Mrs. Palmer as postmaster. It is generally thought that Mrs. Laura Home will be appointed as her successor. Gen. Cox having endorsed her application, and we doubt not that she will make a most efficient and obliging postmaster, and will receive the heart-felt congratulations of her many friends.

A Lost Man.—The friends and family of Mr. William A. Carida, of Matthews township, are very anxious to discover his whereabouts, for during a temporary fit of insanity he has strayed off and cannot be found. He was here last week as a juror, and on Friday afternoon started home in company with his son. They camped that night about 9 miles west of here, and during the night Mr. Carida went away and has not since been heard of, although the entire neighborhood has been diligently searching for him. Any information as to his whereabouts will be most thankfully received by his family, near Siler Station. He is about 50 years old, has sandy gray hair, with beard under his chin, is about 5 feet 10 inches tall, and in walking his right shoulder droops slightly. When last seen he wore a dark gray Saker coat, brown pants and black vest and hat. He is perfectly harmless, and it is feared he may starve himself to death. About eight years ago while returning from Raleigh he wandered off, as he did last week, and when found was almost famished. It is supposed that his present attack of insanity was caused by the excitement of court-week and the loss of sleep on last Thursday night when he was on the jury that was "hung all night."

SEPARATION COURT.—This will be a memorable term of our superior court, and probably the longest that we have ever had. The judge will not be able to leave before next Saturday, and even then most of the civil cases will be continued until the next term, which will be held in February. The case that was being tried when the Record was issued last week was that of the State against Jake Rogers for burning Mr. Hadley's mill. The jury after being "hung" all Thursday night returned a verdict of guilty on Friday morning, and yesterday the prisoner was sentenced to the penitentiary for ten years. The only civil case that has yet been tried is the Faucette will case, the trial of which consumed five days. This is the most important civil suit ever tried in this county, the amount of property in dispute being valued at \$20,000. There was quite an array of lawyers on each side, Messrs. J. W. Himsdale, F. H. Busbee, B. I. Howze, L. C. Edwards, W. E. Murchison, and H. A. London appearing for Mrs. Bynum and Messrs. L. C. Fuller, John W. Graham, John Manning, T. B. Womack, J. G. Rencher and A. P. Gilbert appearing for Mrs. Moring. The contention arose as to which was the will of W. C. Faucette, who died in 1883. His sister, Mrs. Elias Bynum, claimed under one will, and his cousin, the wife of Hon. John M. Moring, claimed under an alleged lost will. There were a great many witnesses examined, and much of the evidence was contradictory. The case was argued at great length by the counsel, whose speeches, as well as the examination of the witnesses, were listened to with close attention. The argument closed after 9 o'clock Tuesday night, and yesterday morning the Judge delivered his charge to the jury, which then retired, and after a consultation of about two hours, returned a verdict in favor of Mrs. Moring. An appeal has been taken to the Supreme Court, so it is possible that this famous case may again be tried.

The State docket was taken up again yesterday, after the conclusion of the Faucette will case, and a jury was empaneled to try the case of the State against John Alston (colored) for burning the barn of J. E. Perry. This case consumed the remainder of the day, and will be resumed today.

Our Poor-House. The grand jury last week made the following report upon the condition of the county jail and poor-house: "To His Honor, J. A. Guzman, Judge of the Superior Court of Chatham county, October Term, 1885: The Jurors of the county make report that they have carefully examined the jail and poor-house, and inquired diligently into the management of both, and that the jail is in a good and substantial condition for the safe-keeping of prisoners, and that the inmates of the same are suitably fed and comfortably and healthfully cared for by their keepers. We also find that there are forty-four inmates of the county poor-house and asylum, thirty-four whites and ten blacks. Five of these inmates are insane persons confined in a strong and suitable building separate from the other buildings. We find that all the buildings and yards of the same are reasonably comfortable, clean, and healthful for the recent past and present weather, and with slight improvements already in contemplation by the immediate authorities in charge will well provide for the change of weather soon to take place. We find the paupers are well fed, clothed, and tenderly cared for by the overseer and physician in charge, both in their sickness and health. We also find that the paupers are themselves well pleased and delighted with the attention and kindness they receive, with one single exception only. We are constrained to mention and approve of the excellent management, care and profit of the county farm and stock at the poor-house. There is also a team of mules as there is in the county; that the overseer has caused to be raised the past season 100 bushels of wheat, 100 bushels of Irish potatoes, an abundance of hay and other forage, turnips, cabbages, etc., and by estimate 35 barrels of corn, with hogs and cattle. We earnestly recommend to the commissioners the purchase of one or more additional mules to complete and make nearly perfect the domestic arrangements of this important public charity.

All of which is respectfully submitted. JOSEPH W. CALDER, Foreman of Grand Jury."

Letter From Greensboro'. GREENSBORO, Oct. 10, '85. TO THE EDITOR OF THE CHATHAM RECORD: Dear Sir: Thinking a few lines from this city might interest your readers, and as my duties as United States juror here leave me some time for observation, I am tempted to essay the role of newspaper correspondent and accordingly find myself writing a letter for publication, if you deem it sufficiently interesting. On arriving in Greensboro I noticed very many improvements going on, a building boom seems to have struck this city very severely, new houses are going up in every direction, quite a number of which are not only substantial residences but evince a considerable amount of architectural beauty. The new Federal Court House and Post office is rapidly approaching completion, and whilst it is not an imposing structure, it really presents a fine appearance and is quite an ornament to the town.

The merchants here all seem to be doing a good business, the proprietors of the various tobacco warehouses are preparing to do an important trade the coming winter, and promise to secure the very highest prices for tobacco sold under their auspices. The Banner Warehouse, which was previously the largest in the city, has just been enlarged, and if it receives all the tobacco that its space will accommodate, Mr. Williams, its proprietor, will have no cause to complain of a lack of trade. Whilst visiting this last named establishment yesterday I heard considerable talk about a newly invented tobacco barn, and finding that it was in operation in the suburbs of the city I walked out to look at it and for the benefit of the tobacco-growers of Chatham county I will give a brief description. The structure itself is just a plain plank building. It is heated by fires from two furnaces with one return pipe, just the ordinary arrangement, but the interior of the barn is very different; the tier poles instead of being fixed solidly in the walls are bolted together, making a kind of frame which is a foot or so smaller than the inside measure of the barn and is swung up or suspended so that it will swing backwards and forwards with a motion of about a foot; a large lever is placed outside of the barn and a connecting rod passes from the lever through the wall of the barn and is attached to the frame-work inside, and although the barn was full of tobacco it required very little exertion to operate the lever and make it swing. The object of this motion is, I understand, to diffuse the heated air uniformly throughout the barn. On the tier poles is placed a very simple device for securing the tobacco sticks, making it impossible for one to fall off. In the roof of the barn are several ventilators and on the outside there is a drain or air passage running from the barn thirty or forty yards; this passes in under the barn and has an opening in about the center of the floor. There is a gateway by which this air passage may be opened or shut at will, and it is claimed by the inventors that to open this and the ventilators and let a current of air pass through the tobacco causes a much more rapid evaporation and consequently a quicker curing of tobacco. They may also be used for regulating the temperature by letting cold air into or heated air out of the barn. And this drain, or air conduit as the inventors call it, can be used to bring the tobacco in order by pouring a few buckets of water down it, the air then passing through it enters the barn impregnated with moisture and it feels inside like it would on a very damp day. The result is the tobacco is in order in a very short time. And now, Mr. Editor, the funniest part of this, as it appears to me, is the fact that this is the joint invention of two of Greensboro's pioneers, who in this case have pooled their issues and gotten up a really good thing and one that I would advise all persons interested in tobacco curing to investigate.

There are several other things I would like to speak of but the length of this forbids. Yours very truly, J. B. GRUBBS.

P. S. I omitted to state that the invention described above is protected by the United States Patent Laws and that it is claimed for it, the tobacco is cured in half the usual time and is a very superior quality. I shall try to get a sample and bring with me when I return to Chatham county.

Longest Fast on Record. A despatch from Syracuse, New York, dated 8th inst., says: Mrs. Veronica Balla, who performed a remarkable fast in this city, died this morning. The fast began August 10, fifty-nine days ago, and since that time she did not touch a morsel of solid food; living entirely on water in which small quantities of morphia were dissolved.

Rev. Dr. J. L. M. Curry, of Va., has been appointed Minister to Spain. To steal an umbrella is not just a crime. But if a man steals a bottle of Dr. Bull's Cough Syrup to cure his cough, can it be called a crime?

Ever alive to the best interest and advantages of our patrons and fully realizing that thereby our own success depends, we will be prepared to show you within a few days the grandest display of DRY GOODS, FANCY GOODS, NOTIONS, CLOAKS, &c., &c., ever brought to this market. Our aim in buying our Fall stock shall be directed toward a continuation of the choicest, cheapest and best market affords. Soliciting a share of your patronage. We are yours truly, C. & M. PRITZELBERGER, Greensboro' N. C.

The merchants of Chatham will please remember that J. W. Scott & Co., of Greensboro', N. C., is the largest and oldest wholesale house in the city. The only house that sells dry goods and notions at wholesale only. Their grocery store is full of goods in that line. They buy dried fruit, wool, rags, flour, eggs, &c. J. W. SCOTT & CO.

THE MARKETS. Reported for THE RECORD by WYATT & TAYLOR, ORDERS & COMMISSION MERCHANTS, No. 12 South-side Market St. RALEIGH, N. C., October 15, 1885.

COTTON MARKET. Good Middling, 15 1/2; Middling, 15; Short Low Middling, 14 1/2; Strict Low Middling, 14.

WHOLESALE GROCERY MARKET. Meal, 47; Flour, 8 1/2; Corn Meal, 10 1/2; Sugar, 12 1/2; Coffee, 15; Tea, 18; Rice, 10; Beans, 8; Lentils, 7; Peas, 6; Potatoes, 4; Apples, 10; Butter, 18; Eggs, 15; Candles, 10; Soap, 8; Lard, 12; Hams, 15; Bacon, 12; Pork, 10; Cattle, 10; Hogs, 8; Chickens, 10; Turkeys, 12; Geese, 10; Ducks, 8; Fish, 10; Oysters, 10; Lobsters, 10; Shellfish, 10; Dried Fruit, 10; Spices, 10; Condiments, 10; Pickles, 10; Canned Goods, 10; Bottled Beverages, 10; Soft Drinks, 10; Alcoholic Beverages, 10; Perfumery, 10; Stationery, 10; Printing, 10; Miscellaneous, 10.

THE MARKETS. (Continued) Wheat, 1 1/2; Oats, 1; Corn, 1; Hay, 1; Straw, 1; Timber, 1; Lumber, 1; Brick, 1; Stone, 1; Coal, 1; Oil, 1; Gas, 1; Iron, 1; Steel, 1; Copper, 1; Lead, 1; Zinc, 1; Tin, 1; Silver, 1; Gold, 1; Platinum, 1; Nickel, 1; Aluminum, 1; Magnesium, 1; Potassium, 1; Sodium, 1; Calcium, 1; Barium, 1; Strontium, 1; Bismuth, 1; Antimony, 1; Arsenic, 1; Selenium, 1; Tellurium, 1; Iodine, 1; Bromine, 1; Chlorine, 1; Fluorine, 1; Oxygen, 1; Hydrogen, 1; Nitrogen, 1; Carbon, 1; Silicon, 1; Phosphorus, 1; Sulfur, 1; Magnesium, 1; Zinc, 1; Iron, 1; Steel, 1; Copper, 1; Lead, 1; Zinc, 1; Tin, 1; Silver, 1; Gold, 1; Platinum, 1; Nickel, 1; Aluminum, 1; Magnesium, 1; Potassium, 1; Sodium, 1; Calcium, 1; Barium, 1; Strontium, 1; Bismuth, 1; Antimony, 1; Arsenic, 1; Selenium, 1; Tellurium, 1; Iodine, 1; Bromine, 1; Chlorine, 1; Fluorine, 1; Oxygen, 1; Hydrogen, 1; Nitrogen, 1; Carbon, 1; Silicon, 1; Phosphorus, 1; Sulfur, 1; Magnesium, 1; Zinc, 1; Iron, 1; Steel, 1; Copper, 1; Lead, 1; Zinc, 1; Tin, 1; Silver, 1; Gold, 1; Platinum, 1; Nickel, 1; Aluminum, 1; Magnesium, 1; Potassium, 1; Sodium, 1; Calcium, 1; Barium, 1; Strontium, 1; Bismuth, 1; Antimony, 1; Arsenic, 1; Selenium, 1; Tellurium, 1; Iodine, 1; Bromine, 1; Chlorine, 1; Fluorine, 1; Oxygen, 1; Hydrogen, 1; Nitrogen, 1; Carbon, 1; Silicon, 1; Phosphorus, 1; Sulfur, 1; Magnesium, 1; Zinc, 1; Iron, 1; Steel, 1; Copper, 1; Lead, 1; Zinc, 1; Tin, 1; Silver, 1; Gold, 1; Platinum, 1; Nickel, 1; Aluminum, 1; Magnesium, 1; Potassium, 1; Sodium, 1; Calcium, 1; Barium, 1; Strontium, 1; Bismuth, 1; Antimony, 1; Arsenic, 1; Selenium, 1; Tellurium, 1; Iodine, 1; Bromine, 1; Chlorine, 1; Fluorine, 1; Oxygen, 1; Hydrogen, 1; Nitrogen, 1; Carbon, 1; Silicon, 1; Phosphorus, 1; Sulfur, 1; Magnesium, 1; Zinc, 1; Iron, 1; Steel, 1; Copper, 1; Lead, 1; Zinc, 1; Tin, 1; Silver, 1;
