"No, auctioneers,"-New York Sun.

Chocolate is a kind of hard pasts, the sinciple part of which is the pulp of the chocolate nuts. The cocoa, from which it comes, is a tree that has been brought into great prominence only a comparatively recent years, although for many generations it has been exerising teneficient influences upon mil ions of the human race. The Spanish word is even, signifying unt. The coron nit palm grows in warm climates, and atdus the height of from 60 to 90 feet. The stem is similar to an apothecary's portar, being of equal diam ter at each nd, but tipering somewhat in the mid-He. The back is smooth, of a pale own, and the tree generally inclines on . The fruit is shaped like a number, given while growing, then langing to a blush red color with pink points, and contains from 20 to 30 mits. The cally call the encountry policies composed of five sepals; the petalscare five, lengthered into a strap like form, at the quex. The stamens are five each with hable authors, and a hern the appendigs between each filement, the style is filliform with a five partd stigms, the fruit a five willed exposle aithout valves, the see is embedded in a soft pulp, and thick, oily, wrinkled otyledors. The species chiefly used in the manufacture of caron and, chocolate are energy and the fruits are collected from both wild and cultivated plants, the size and form of which vary, with the species. The cueso tree is execully cul-Spenish America, and percicularly in Mexico, where, we learn from Humboldt, the time of Montezones and whomee indeed, it was transplanted into other dependencies of the Spanish Monarchy, The name by which the plant and the feed prepared from its seek are recognized in the present time are derived from the Mexican language. The Mexican werd checolate is derived from the sound of the stones as They enash to gether in the primitive method adopted. by them for bene-ing the bean and inrepresenting the sugar and vanilla, and from this came: the Euslish word choose The seeds of the enemy were made and, the heat-wain gave a long blow is the of a money in Maxiso in the time of the Azt v kings, and this use of them is still partially continued. But the Cicaothe is not emiliard to Mexico. It is extensively grown in Central America, Bradi, Peru, Venezuela, Caraccae, Ecuador, Dimerara, Guayaquit and Section; it is also extendively out award in Trumlad,
