The Chatham Record

THURSDAY, JANUARY 19, 1893.

LOCAL MATTERS.

—Nice Family Flour, only $4.00 a barrel at O. S. Poe & Son's.

—Dogwood, persimmon and hickory timber wanted at the Pittsboro Shuttle Mill.

—The ice houses here have been filled with the thickest ice ever before put up at this place.

—This winter has "broken the record" and will always be remembered as the cold winter of 1892-'93.

—For one time the young folks have had enough skating, and no longer seem to take any pleasure in that exhilarating sport.

—Dr. John H. London, of Raleigh, will be at Pittsboro on the first Monday in every month and remain three days, prepared to do any kind of dental work.

—For monuments and tombstones of the latest and prettiest designs write to Robt. I. Rogers & Co., proprietors Durham Marble Works, Durham, N. C.

—The next term of Chatham superior court will begin on the 13th of February, three weeks from next Monday. Judge Henry R. Bryan of New Berne, will hold the court.

—Dr. W. H. Edwards, of Wake Forest, will visit Pittsboro' on Monday, Tuesday and Wednesday following the third Sunday in every month, and will be prepared to do any kind of dental work: office with Chapin & Headen.

—Sleigh riding seems to have lost its attraction, for although the snow has been in excellent condition, yet not a sleigh has been running here within the past two or three days. Too much of a good thing is not appreciated.

—Cards are now out announcing the approaching marriage of Mr. Duncan E. McIver to Miss Kate Scott, daughter of Maj. John W. Scott, at Sanford, on next Wednesday night. The Record extends its congratulations.

—We hope to publish next week all the corrections and additional names of Chatham [illegible] that have been sent [illegible]. If there are any more [illegible] them at once, so that all corrections may be published in the same issue.

—In addition to the attempt to establish Bingham [illegible] attempt will also be made at the present session of the Legislature for the erection of a new county, to be composed of parts of Cumberland, Moore, Chatham and Wake counties, to be called "Blakely."

—They have received at W. I. London & Son's a car load of crop manure, which they are selling very cheap. A complete [illegible] as ever. They have a full stock of all kinds of heavy and fancy groceries. A lot of overcoats for men and boys, very cheap.

—Take care of your horses this cold weather. W. I. London & Son have a few horse blankets which they are selling very low for cash. Also, a nice lot of bed blankets, comforts and lap robes. A few overcoats on hand very cheap. Gents', ladies' and children's underwear.

—A large buck deer was seen last week near McRae's store, in Hadley township, and was chased by a number of men with dogs until it disappeared at Woody's ferry, in Alamance county. A wild deer is so rarely seen in this section that his appearance created some excitement in that neighborhood.

—Did you ever know a month in which there was no full moon? If not, then you will find such a month in February of this year, for in that month (strange to say) there will be no full moon. There is a full moon on the 31st of January and another on the 1st of March, but none in February. Did you ever?

—It is said that snow will make a good wheat crop. If this be true then the crop this year ought to be the best almost ever before known, for there has been enough snow during the past three weeks to satisfy anybody. The severe cold no doubt has destroyed many insects that would injure the crops, so after all the snow and cold may be of much benefit.

A SHOCKING DEATH.—Miss Lina McDonald, the youngest daughter of our former countyman, Col. John A. McDonald, was instantly killed, on last Monday, by being run over by a train on the C. F. & Y. V. railroad in the suburbs of Greensboro. She was walking on the track, and, it is supposed, did not see the train in time to escape. The deceased was an accomplished young lady, greatly beloved by all who knew her, and had recently been employed as a teacher in the State's Female Industrial School, lately opened at Greensboro. Her many friends at this place, where she was born, will be greatly grieved to hear of her sudden and shocking death.

OLD CITIZEN DEAD.—The many friends of Capt. Elias Bryant, of this county, will regret to hear of his death, which occurred at the residence of his devoted daughter, Mrs. A. C. Budd, near Lockville, on last Saturday. He was one of Chatham's most prominent citizens, and was about eighty five years old. He was born and reared in Edgecombe county, but removed to Chatham about fifty years ago. He was a very public spirited citizen and took a prominent part in all works of internal improvement, and always labored for that which would promote the interests of the county. He was an uncle of Hon. B. H. Bunn, the late United States Representative in Congress from this district.

COURT ATTENDANCE.—Last Thursday was the day for the regular quarterly meeting of the county alliance, but no meeting was held. Heretofore these quarterly meetings have been largely attended, delegates usually being present from nearly every sub alliance in the county. There are, or were, forty-five sub alliances in Chatham, but on last Thursday delegates from only six of them came here to attend the quarterly meeting. No doubt the severe weather deterred some from attending, but such weather would not have deterred so many, two years ago, before the third party leaders had turned the Alliance into a political machine. The truth of the matter is that the democratic alliancemen feel that the alliance has been captured by the third party leaders and diverted from its original purposes, and consequently they no longer take any interest in it.

CHATHAM'S LEGISLATORS.—The members of the legislature from this county are determined to be heard from at the next session. Atwater and Fuller for the Senate, Mr. Walker has had the good sense to keep quiet. Mr. Scott made no such [illegible] as a legislator in opposing the resolution to appropriate $5000 for defraying the inaugural expenses of Gov. Carr. The laugh was quickly turned on him by Dr. Jacob A. Long, of Alamance, replying to him and saying, "that if Evans had been elected Governor Mr. Scott would now be dancing!"

Every time that Senator Walker attempts [illegible] promptly "put down" one. For instance, Senator Walker of Alamance [illegible] a resolution to exempt the county from the payment of the [illegible] and Mr. Walker [illegible] it did not at all [illegible] opposed it, and moved to lay it on the table, but at once the Senate refused to take it. Again, on another day a resolution was introduced requesting persons not to [illegible] the [illegible] Mr. Atwater moved to lay this on the table, but [illegible] this motion. The Senate [illegible] will not [illegible] Next morning one of the [illegible] this place with a load of wood, and found him lying dead in the road that leads from the house to the public road. His death must have been instantaneous, for he had fallen flat on his face with his right hand pressed to his chest, just as anyone would naturally do when a pain strikes the heart.

Mr. Hatch was about 60 years old, and was a man of strict integrity of character, who stood well with his neighbors and family connections. He leaves a wife and five children, to whom we extend our heartfelt sympathy at their irreparable loss.

THE OLDEST WINTER.—We have often heard the old people talk of how much colder the winters were when they were young than they have been since that time, and we know that the past few winters have not been very cold. But we insist that this winter has had more continuous cold weather than any within the memory of the oldest inhabitant", and we deny a successful contradiction of this assertion. No doubt many readers have had a few days as cold as any of this winter, but no winter have had so many severely cold days, and yet this winter is only half gone. In order to prove our assertion and to put on record the temperature of this winter, we have obtained [illegible] from Mr. A. B. Merritt, who is the observer at this place of the Weather Bureau, and below we give the [illegible] temperature at 7 o'clock each morning, which is the hour of observation by the government. For instance, the reading for Monday morning is the temperature as it was at 7 o'clock on that morning, and so on. Mr. Merritt's thermometer, which is [illegible] placed on the north [illegible] ten feet from the ground, the coldest day before Christmas was Tuesday giving Dec. 20th of November when before daylight the temperature was 13 degrees above zero. This is the coldest we ever knew in November. The next coldest day before Christmas was the 23rd of December, when it was 15 degrees above zero. The coldest days since Christmas and the lowest degrees of cold are as follows, viz: December 27th, 16 degrees above zero; 28th, 17; 29th, 3 degrees below zero; 30th, 21 below zero, and the 31st, 14 above zero. During this month (January) the minimum temperature has been as follows: on the 6th, 14 degrees above zero; on the 7th, the same; the 8th, 18; 9th, 13; 10th, 21; 11th, 2; 12th, 20; 13th, 9; 14th, zero; 15th, 24; 16th, 4 below zero; 17th, 5 degrees below zero, and yesterday (18th) exactly at zero.

As our readers are aware, the freezing point according to the thermometer is 32 degrees above zero. And bear in mind that the figures above given are the *minimum* or lowest temperature during each twenty-four hours, and was *before daybreak*. This will account for these figures showing colder weather than may have been indicated by other thermometers that are not self-registering and which were not looked at until daylight, when the temperature had risen a little.

In addition to all this cold, it has snowed six times since Christmas—a December 27th, and January 4th, 7th, 11th, 13th and 17th, and the ground is still covered with snow.

If our readers will clip this out and put it away, it may be of interest to them in future years in showing how cold was the "cold Winter of 1892-93". And, as above stated, the winter is only half gone!

For the Record.

Union Meeting.

CHATHAM RECORD: Please publish Union Meeting at Sandy Creek Association at Rocky River, January 27, 28, 1893.

Sermon, Friday, 8 P. M., S. Gilmore, Or Substitute.

1. The importance of every Baptist loyally taking the *Rules of Decorum*. J. L. Smith, L. R. Dixon, G. L. Morris.

2. Best plan to increase the benevolence of our churches. W. H. B. Lawhon, S. Gilmore, R. F. Andrews.

3. Can any one claim to be a Christian, who refuses to unite with a church, and never works for the Prosper of the Lord's cause? W. G. Cone, D. P. Sears, G. W. Burgess.

Saturday evening: Reports of associational committees, and meeting of the Executive Board.

On Sunday: S. S. mass meeting and ordinary sermon.

C. T. EDWARDS, Mod.

Planting Fruit Trees.

There are two periods of opposite seasons in regard to planting fruit trees, and it is proper to speak of each as it comes around. Now, before the buds start, is the time we would say, "Let all fruit trees be planted." Then, if the ground is in good condition, the trees will grow off finely, and be ready to bear fruit the next season. Many trees are planted in the fall, but we prefer spring planting, for the reason that the ground is more likely to be in good condition, and the trees will grow off better. Trees planted in the fall are liable to be thrown out by the frosts of winter, and the roots are liable to be injured by mice, which are very destructive to young trees in the winter season. Trees planted in the spring are not liable to these objections, and will grow off more vigorously than those planted in the fall.

Peach trees should be planted in the fall, as they are liable to be killed by the borer if planted in the spring. Apple trees will do well planted in the fall or spring, but we prefer spring planting. Pear trees do well planted either in the fall or spring, but we prefer spring planting. Plum trees do well planted either in the fall or spring, but we prefer spring planting. Cherry trees do well planted either in the fall or spring, but we prefer spring planting. Grape vines do well planted either in the fall or spring, but we prefer spring planting. Currant bushes do well planted either in the fall or spring, but we prefer spring planting. Gooseberry bushes do well planted either in the fall or spring, but we prefer spring planting. Raspberry bushes do well planted either in the fall or spring, but we prefer spring planting. Blackberry bushes do well planted either in the fall or spring, but we prefer spring planting. Strawberry plants do well planted either in the fall or spring, but we prefer spring planting. Asparagus roots do well planted either in the fall or spring, but we prefer spring planting. Rhubarb roots do well planted either in the fall or spring, but we prefer spring planting. Horseradish roots do well planted either in the fall or spring, but we prefer spring planting. Onion sets do well planted either in the fall or spring, but we prefer spring planting. Potatoes do well planted either in the fall or spring, but we prefer spring planting. Peas do well planted either in the fall or spring, but we prefer spring planting. Beans do well planted either in the fall or spring, but we prefer spring planting. Corn does well planted either in the fall or spring, but we prefer spring planting. Tomatoes do well planted either in the fall or spring, but we prefer spring planting. Cucumbers do well planted either in the fall or spring, but we prefer spring planting. Melons do well planted either in the fall or spring, but we prefer spring planting. Squash do well planted either in the fall or spring, but we prefer spring planting. Pumpkins do well planted either in the fall or spring, but we prefer spring planting. Okra does well planted either in the fall or spring, but we prefer spring planting. Sweet potatoes do well planted either in the fall or spring, but we prefer spring planting. Irish potatoes do well planted either in the fall or spring, but we prefer spring planting. Turnips do well planted either in the fall or spring, but we prefer spring planting. Beets do well planted either in the fall or spring, but we prefer spring planting. Carrots do well planted either in the fall or spring, but we prefer spring planting. Parsnips do well planted either in the fall or spring, but we prefer spring planting. Salsify does well planted either in the fall or spring, but we prefer spring planting. Cabbage does well planted either in the fall or spring, but we prefer spring planting. Cauliflower does well planted either in the fall or spring, but we prefer spring planting. Broccoli does well planted either in the fall or spring, but we prefer spring planting. Brussels sprouts do well planted either in the fall or spring, but we prefer spring planting. Kale does well planted either in the fall or spring, but we prefer spring planting. Collards do well planted either in the fall or spring, but we prefer spring planting. Mustard does well planted either in the fall or spring, but we prefer spring planting. Spinach does well planted either in the fall or spring, but we prefer spring planting. Lettuce does well planted either in the fall or spring, but we prefer spring planting. Endive does well planted either in the fall or spring, but we prefer spring planting. Celery does well planted either in the fall or spring, but we prefer spring planting. Parsley does well planted either in the fall or spring, but we prefer spring planting. Sage does well planted either in the fall or spring, but we prefer spring planting. Thyme does well planted either in the fall or spring, but we prefer spring planting. Rosemary does well planted either in the fall or spring, but we prefer spring planting. Lavender does well planted either in the fall or spring, but we prefer spring planting. Hyssop does well planted either in the fall or spring, but we prefer spring planting. Marjoram does well planted either in the fall or spring, but we prefer spring planting. Basil does well planted either in the fall or spring, but we prefer spring planting. Dill does well planted either in the fall or spring, but we prefer spring planting. Fennel does well planted either in the fall or spring, but we prefer spring planting. Anise does well planted either in the fall or spring, but we prefer spring planting. Caraway does well planted either in the fall or spring, but we prefer spring planting. Coriander does well planted either in the fall or spring, but we prefer spring planting. Cumin does well planted either in the fall or spring, but we prefer spring planting. Saffron does well planted either in the fall or spring, but we prefer spring planting. Tarragon does well planted either in the fall or spring, but we prefer spring planting. Chervil does well planted either in the fall or spring, but we prefer spring planting. Burnet does well planted either in the fall or spring, but we prefer spring planting. Borage does well planted either in the fall or spring, but we prefer spring planting. Hyssop does well planted either in the fall or spring, but we prefer spring planting. Rue does well planted either in the fall or spring, but we prefer spring planting. Wormwood does well planted either in the fall or spring, but we prefer spring planting. Tansy does well planted either in the fall or spring, but we prefer spring planting. Mint does well planted either in the fall or spring, but we prefer spring planting. Pennyroyal does well planted either in the fall or spring, but we prefer spring planting. Catnip does well planted either in the fall or spring, but we prefer spring planting. Horehound does well planted either in the fall or spring, but we prefer spring planting. Balm does well planted either in the fall or spring, but we prefer spring planting. Lemon balm does well planted either in the fall or spring, but we prefer spring planting. Bergamot does well planted either in the fall or spring, but we prefer spring planting. Monarda does well planted either in the fall or spring, but we prefer spring planting. Scarlet monarda does well planted either in the fall or spring, but we prefer spring planting. Purple monarda does well planted either in the fall or spring, but we prefer spring planting. White monarda does well planted either in the fall or spring, but we prefer spring planting. Yellow monarda does well planted either in the fall or spring, but we prefer spring planting. Pink monarda does well planted either in the fall or spring, but we prefer spring planting. Blue monarda does well planted either in the fall or spring, but we prefer spring planting. Violet monarda does well planted either in the fall or spring, but we prefer spring planting. Orange monarda does well planted either in the fall or spring, but we prefer spring planting. Red monarda does well planted either in the fall or spring, but we prefer spring planting. Green monarda does well planted either in the fall or spring, but we prefer spring planting. Black
