How Paintings in Mosaie Are Made.

In order to reproduce a painting in mosaic, the artists, or hitisans, take a that sheet of iron of the same size as the painting, surrounded by a border about an Inch high. Tass recontacle is then filled with plaster, so as to obtum a perfectly fl 1 surfaces. On this the outlines of the ligares are drawn. The plaster is then cut up into small remove and

THE ORANG KOOBOUS. The Most Degraded Bace of Men in the

World. The Busmen of South Africa have teen often spoken of as the lowest in the scale of humanity—the connecting link between man and monkey; but there is a race known as the Orang Kooboos, or Brown Men of the Island of Sumatra, who present a stronger claim to that distinction. They are described as covered with bair and having long arms. They are deficient in chin, or rather that feature forms little part of the face. Some explorers of the island were at first disposed to class them as simply a somewhat higher development of a somewhat higher development of the orangeoutang, but this idea was dispelled by the facts that they pos-sess speech, though exceedingly rude and monosyllabic, have perceptive faculties and resemble the rest of mankind in their formation. They are, moreover, recompised as below are, moreover, recognized as long ing to the human race by the Malays. ing to the human race by the Malays, who, however, hunt them as wild an-imals, in order to work them as beasts of burden. These singular people are only to be met with in the almost impassable swamps and for-ests of the Island. They live among the beam of the stand. the branches of the teak and mar-ringin trees, which grow to an enor-mons size. They construct a rule platform of bamboos wherever they can find a sufficient number of hori-zental limbs of a tree to serve as the basis or sleepers for a floor, and over this they raise a rude conical roof of split baniboos and cocoanut leaves. These savages subsist almost exclusively upon fish, which abound in all the rivers and bays of that portion of the Pacific. It has been found inissible to teach the Kooboos the use garments, although they manifest a great fondness for pieces of colored cloth, which they will attach to vari-ous parts of their bodies. They will the a vest to their heads or around their waists with a lively grinning and grunting of delight, and seem to make no distinction between a sim-ple piece of cloth for ornament and a manufactured article, the only ground for preference being the difference of olors. It has been impossible to each those in captivity the language of their masters, for after every effort they still spoke the Malay in an un-couth monosyllable manner, like their own jargon of unclassified whatever of marriage but merely pair off for a season, nor do they give any evidence of belief or con-sciousness of the existence of a spir-Itual being.

Notwithstanding the utter degrad-ation of this hairy, brutish race, they seem to be no insignificant contributors to commerce, for in some of the impassable forests of Sumatra they have been the chief collectors of beaoin or gum benjamin. Curious tories are told about the manner of trading with the Orang Kooboos. The trader proceeds to a certain point on the edge of a forest, at cer-tain periods of the year, with quanti-ties of colored cloths, beads, and other trifles; he then beats a going for some length of time at various intervals during one or two days as a sig-nal, and then retires to a considera-ble distance to return in about a week, when he finds satisfactor; quantities of benzohn in place of his goods, which have been carried away in the Verbase. ht the Koob os.

systematic Osculation.

The monks of the middle divided the kiss into fifteen distinct and separate orders--first, the decor-ous, or modest kiss; second, the dip-iomatic, or kiss of policy; third, the spying kiss, to ascertain if a woman has drunk wine: fourth, the slave kiss; fifth, the kiss infamous, a kissi fitth, the kiss inflations, a church penance: sixth, the slipper kiss, practiced toward tyrants; sev-enth, the indicial kissi eighth, the fendal kiss: ninth, the religious kiss, kissing the cross; tenth, the academcal kiss, on joining a solemn brother hood: eleventh, the bind kiss twelfth, the Judas kiss; thirteenth, the medical kiss, for the purpose of healing some sickness: fourteenth, the kiss of etiquette; fifteenth, the kiss of love, the only real kiss.

Be on your Guard

If some grocers urge another baking powder upon you in place of the "Royal," it is because of the greater profit upon it. This of itself is evidence of the superiority of the "Royal." To give greater profit the other must be a lower cost powder, and to cost less it must be made with cheaper and inferior materials, and thus, though selling for the same, give less value to the consumer.

To insure the finest cake, the most wholesome food, be sure that no substitute for Royal Baking Powder is accepted by you.

Nothing can be substituted for the Royal Baking Powder and give as good results.
