erGood-Bye,"

Good-bye, good bye, it is the awestest bless

ing That falls from mortal tips on mortal The weakness of our human Love confess

The promise that a love more strong is May God be with you!

Why do we say it when the tears are starting ?
Why must a word so sweet bring only

pain? Our love seems all sufficient till the parting -And then we feel it impotent and valu — May God be with you!

Detter than earth'y presence, e'en the

dearest,
Is the great blessing that our partings For in the loneliest moments God is nearest.

And from our sorrows heavenly comforts If God be with you.

Good-bye, good-bye, with latest breath we A legacy of loops, and faith, and love; Parting must come, we cannot long delay it, But, one in Him, we hope to meet above,

Good-bys-'tis all we have for one another. Our love more strong than death is help-less strik.

For none can take the burden from his Or shield except by prayer, from any

THE TIGER IN THE POOL.

BY W. A. PHASED.

Reynolds belonged to the Indian state milway service, but he didn't mean any harm by that; it was only a way he had of making a living. was engineer in charge of a district where there was good shooting, so in addition to being a "rant-carriage fellow," he was a timer bunter of well-

The following adventure which befel him he related to me one evening, Settling himself in his long chair, he took a few vigorous puffs at his eigar, no though he were jumning cartridges day. in a magnetine rule, and give me the following account of his adventure with a mouseater:

"I was stationed near Wavers, in a good to er country, and one day my hunter brought me news of a pair of atraid of man, and had been at the night b force. business for some time, for a farmer who had gotten in their way through naws which crushed in his chull like

"Accompanied by the hunter I went out to survey the ground. It was the dry season, and after a long search we fraving to quarter back and forth to found the royal pair's drinking place; and an ideal report it was too in deeps cool pool in a thick jungle. The pugs showed me that they came there | me to a deep dry rayme. I felt that

"They were here in the morning. had examined the freshest foo.prints, eager tones; 'Near, sir; very near, "Perunes they come in the evenfug, I suswered. "How do you know it was the morning?"

early that morning, after the lossy taken to the jungle, night weavers had retired to their

probably fight sky of a bait, so I des three feet weie. termined to build a sort of stage, and get a shot at them as they came to too, about twelve feet from the ground, and long enough so that I could lie stage for hours, perhaps all night, was sticke. I drew it back -it was blood, not to be thought of; eramord musyet supple as a silken cord. Blankets even eigars, for a tiger will wind a white man quicker than he will net gur, and pay far more attention to him, larraing into my very marrow,

tion in the platform at nightful to- an elernity. I see he was about to gether with the hunter. As I by spring and find my excess at him there my head was directly over the point blank from my sole, without pool, and I flattered myself that I waiting to take and, should get a smashing good shot at tigers are rather erratic to their movenight waiting for them About mid- was down, two, but I could see that he vinely tall - Puck.

OI was awakened by some one pinching my arm; Baloo was whispering, "the tigers are here, sir," and sure enough, down in the pool, not fifty feet from me, I could hear them lapping and splashing the water,

"It was still dark-very dark, so dark that their forms failed to outline against the dense mas which surrounded the water. This was a contingency I had not taken to necount. They were there, but it was so dark I the pool the twinkling stars were re- homeward journey. fleeted, and in desperation I determined to take one as a mark, and when it was darkened by some object to blaze away. I soon got my chance, and emptied my 'express,' not into the star, but into some of ject which had

come between it and me, "For a few moments prodemonium reigned in that bit of jungle. One of the tigers was hit, and hit hard, judging from the fiendish row it was kicking up. I emptied my spare rifle into the noise, that was all I had to fire at, but with what success I could not tell, for the first shot had stirred up as much row as two tights are capable of makin a

"Presently there was a full in the conversation, and I concluded that they had made off. It was really too much to expect that I had begged them both, and that they were both. Germans mole the first horseshoe with ile nel.

"There was nothing for it but to stick to the platform till daylight, which I did, outring in the time asleop. I was awake sell by B doo, at the first sign of day. Falms very cold and numb, I serambled down from my nights resting-place, and I proceeded to recommittee, very car fully, I must confess, for I did not reliab stambling over a wounded tiger, so early in the

"We found tracks on the further side of the poor, and plenty of blood marks, showing that one of them at least was severely wounded. I foltauce, but seeing that we were likely tigers that had been killing cattle near to have a pretty long tramp of it, a neighboring village. They were a called a halt, and sat down to cat the rather victors pair, too, not much limch I had brought with me the

"Atter busch, I falt quite equal to the task ahead of me - t task in liquitprotecting hescattle, had recayed a into perhaps the most dange one in sweeping put from one of their mighty the world-the following up of a wounded tiger on fact in a broken

"A long tramp of about three miles, sometimes lose my the trad; pick it up again, and so notimespress ing forward in hot haste where it was easy picking up the marks brought we were not for from our game in this pines, and Balan's exes markled sir," exclaimed the fronter, after he in auticipation as he winsperiol in

"We were going steadly along the cavity bed, when Baloo suddenly cangit me by the arm and craned hi "He pointed out to me that all the head in a listening attend . We sould bear sumothme the dew sparkled and glittered like into the one we were in. Almost at our rare diamonds; the fresher page had very feet I saw the page of the tigers degrees of skill and knowledge are into trying to anseat them and kill none of these; they had been made in the soft banks, where they had

"Bidding Balos keep close with the second gan, I started up the sec-"The pool would do better than a ond ravine. It was more like a path kill," for the tigers would be sure to cut in the deep clay banks by the come there, but as they had plenty of rains. As I shoul in it, it was about meat of their own killing they would shoulder high, and not more than

When I had resented a point just opposite to the place I conserved the drink. By evening I had it built and tigers to be, I determined to crawl up all ready, taking care to locate it on the bank, through the almost imponethe lee side of the pool, so that, unless trable jungle undergrowth on its tay. the tigers came up directly behind us, Grasping a small crooper, I pulled my they should not get one win L. Quite body up so that I could force a puscomfortable and strong I had made it, sage through the madergrowth with my hands. As I reached over the mound-like structure of the bank, my down comfortably, for sitting in a hand touched something well and

"Then there rose up before my cles would disable one long before the leves, not three feet from me, the most time when they must be firm as steel, hideous sight I ever saw in my life-a sight which chilled the blood are my and guns, a flask and eights-yes, veins, and transfit I me with horost - a tiger with the lower jow shot away glared at me, with its bidetal eyes

"Thus equipped, I took up my ste cash other I do not know; it secured

"The was a screaming rush of Mr. Stripes or his wife. I did not ex giant body, the flash of a rife so close post them before morning, but as that it searched my check and I found myself flat ou my back in the ray nments, I thought it best to put in the six and almost a raseless. Bulco

night, I fell asleep. Baloo, who had was unburt. He was pointing to the had a long nap, taking my plac: to other bank, and I knew that the tiger had gone clean over when he charged

my fail, I was epriet uninjured, but I felt sure that the tiger had gotten enough to settle him this time. Balon had seen him rise up, and had fired the spare rifle into him just as he charged.

"Cantiously enough this time I worked my way up to the opposts and through the jungle which was less thick on this side. Not twenty yards could not shoot with any certainty of from where we started Mr. Stripes up not planting my bullet in the mud we found him lying with a broken banks opposite. Just in the center of back and soon had his skin on the

"It must have been the mate we heard in the first place, just a little spart from the other. By that us it may, I never saw him again,

"Yes it was a close shave-the ravine sived me,"-- Detroit Free Press,

Short History of Horseshoeing,

Horseshoeing began with the Romans about the eleventh or twelfth century. The first shoe was a thin iron plate, having a rim on the outside, which covered the whole ground surface of the foot. These cru le shoes were held on by leather thongs or small cords fastened to the hoof and eastern. This was followed by a plat: which had are a that was held to the outside of the hoof by pointed hooks. The hooks were soon displaced by units which had square heads. The a crease in it during the lift south contury and soon after shoes were made with calks. From those clamsy shoes to the present. American short was a greatest progress in the science and practice of horseshoons less been made ducing the last twenty-five

In England horseshoers are required to hove a good knowledge of he anatomical structure of the leg and hoof, and are examined by an exumining board. In Saxony the law requires farriers to pass an examination and thur, a serre a diploma before lowed up the tracks for a short it so they can work at the trady. The exuniners are appointed by the government. The Sixon veterinary school at Dresley is face-1 the world over. The grounds enver four seres, and the reverament excelled the buildings, Horseshoeing is tought there as an art, and the farmer turbent ten is on a level with the x for nary a diletel. Five months study as a quare in the department of farriers, and the student is jor through a course of nuatomy. The hore short shops are complete in all respects.

The student in the shops learns the practical part of his chosen trade-to judge how a horse should be shod, how to hold a horse will schooling, how to take off old shows and to propare the hoof for shoring, how to prepare the boof to go barefooted, making all kinds of shors, draving mais, shooring hurses that interfere, to make shoes

He receives general instructions regiver, and the student who displays the horses. If the picadores are skilthe diploma, but is given authority to Jirod rider. place after his mains on the signboard over his shop, "Kieprnefter Hufbesch-

No Courtship in Jerusalem.

Of courtship as it is known in Amertes or England there is none whatever in Jerusalem, writes Edwin S, Walyoung Moleanmolan never sees the tace of the girl who is to become his wife until after marriage. - Ladies' Hone Journal.

A MEXICAN DOC'S SPORE

In Mexico the boys know nothing of baseball, football, cricket, golf lawn tennis and the similar games which to us are household words. They are not interested in boating or saffing or bieyele rilling, ontside of the large towns. What do they file? How do they amuse themselves?

Well, they ride horseback; horse are cheap in Mexico, where it is literally true that beggets rule on horseback; they dance a little, bunt a little and samble a great deal. An l, or course they smoke, beginning at an age when they would hardly by out of kills in this country.

One thing else they do, which is a sport poenitor to thems lyes. They play at builtighting breause it is the ambition of every M-x can boy to be

In minute that they use their showls chanders, use sticks as pikes and a flat piece of wood as a swort. One buy nets as the bull, and the others. nel the part of the year lors, banderfilteres and matcheres.

When they grow old a they partielpate in real bubilights, but of an aninteny kind. Buils are used, but of the common breed, and as an additional production, their horns are sawed

The logs, dre and in all the finery of a professional matabase, enter the ring, tense the buil and carry out the regular programme in all age. The killing of the built. Of course, the built sometimes kills a boy, but his parents regard film as having died like a here on the field of battle, and the wounded boys parade their bruises and scars as proud memorators of the

These amateur fights are considered great exents in e-matry towns, fully cipial to the coming of the girests to an American village. All the young falles, with their chaperones, are present, and of course every man and how who can is softly out into the ampintheatre. Two or three of the young ladios are chosen as 192 toens of the Feast," and a prominent citizen is sebetted as "Mester of the Feast."

When the built is brought rate: the ring the fun begins. Usually he classes every one over the loner and gavorbs around in high stagen. Soon the lighters, with their searlet, green arding the showing of deformed master of the feast blows, the cornet, compount to the special ability and a thorough knowl- ful, they keep off the animal; if not edge of the laten somet only received there is a dead horse and often an in-

Then the banderillos, or little spears, made in instation of sombrelagmeister," which means "master of ros, and other fantastic designs of scientific shoeing,"-Chicago Record, varied colored paper or silk, are hamled to the young man, who attempts to plunge them into the shoulders of the buil. It he succeeds, he is wildly cheered. This ends the first fight. The vaqueros come in and lace in the Ladies' Home Journal. A | beso the bull, take out the banderillos and chose her out of the runs.

The young fighters are then cailed their right shoulders, and they strut about the ring until the cornet calls

The last bull, after going through for twenty-liv, cents rides the infuriated animal about the ring.

Then comes the wind-up, tame bull, with posited horns, is turned loose in the ring, and every boy in the inclosure piles into the rong and waves his scrape madly at the bull, which clases them over the feture and about the ring madiy.

The love are now in their glory.

They are tessing a real built and may

be hart. Often one is trampled on or builty bruised by the built. The rest simply he wi with delight, Such are opertunities offered the inds of Mexico toward their cherished ambition to be como fighters of bloode buils-Golden Days.

TESTING ORES.

How Assayers Discover the Value of Minerals.

The Process of Sampling Used at the Mines.

To the uninitiated but observant stranger who wanders no and down in the laborinth of shafts and tunnels, diggings and dumps of a genuine lets slive. mining camp, perhaps there is no subject more full of interest than the procoss by which a lump of brown ore, which, to his inexperienced eye, looks yield its share of silver and gold; or the means and methods by which the mining man at his side so confidently go 82.35 ounces in silver and \$17.55 in

Even the Eastern mining expert, or graduate from some mining school. will wonder how, in the log cabin or pine shanty, destitute of all the claborate paraphernalia to which he has been accustomed, these results are so readily and necurately ob-

As a general rule the majority of the ores, except those containing the precious metals, for purposes of purclinse and sale, are valued according to the cost of mining and shipping, so that, except for metallurgical purposes, it is unnecessary to seek to determine with much necurses the contents and value of such ores.

In the case of ores rich in the precious metals, however, it is entirely different, as in their purchase and sale, both parties, the boyer as well as the seller, want to ascertain accurately and to a certainty the value of the entire lot. The methods by which this knowledge is obtained are so simple as to be easily understood and practised by many a man who does not know the technical symbols of the metals he is determining, or could not give a scientific exposition of the he is an accurate and successful us-When a quantity of ore is to be
