HER POSITION PAYS.

Queen Victoria Mas Found Ruling a Very Profitable Calling.

Victoria has found queenhood a very profitable calling. Figures for fiftyeven years of her reign show that the British people have given her under the name of civil list expenditures the name of civil In addition to this vast \$110,275,000. total, \$48,876,765 has been expended for the maintenance of seventeen resi-dence, stables and the like. The total direct expenditure of the Queen slone is over \$1,800,600 a year. There is at this date an annual expenditure in addition for other members of the royal family of \$1,800,000. The thrity old lady who has this vast income at her disposal has taken care to "make has while the sun shines." Of course, the money has been voted to cuable her up the ornamental state considered necessary for a royal pos But it is just this she does not do. besides valuable continental property, is the owner of three estates in the United Kingdom. They are Bal moral in Aberdonshire, Scotland: Os-borne House, Isic of Wight, Hamp-shire, and Charlemont, Surrey. They embrace 5.561 acres, with a rental value a year of \$27.805. At twenty years' purchase that would be \$556, 160. In fact, they are worth double

that amount.

Queen Victoria, they say, has her lif-Queen visions, they say, has not use the superstitions. She believes that are theles made by blind persons bring good back, that spilling saft brings had lock; and the would probably not give alapence for her kingdom if by any unchance thirteen persons happened to sit at the reyal dinting table. Unlike smalls of most other very last thing before freezing, nothgrains, the disease does not carry in ing executs Heliauthus maximilianus. the seed. A number of experiments have been made where the seed corn

seriously affected than corn from seed not so treated. The spores full on the young plant, germinate, and develop with the stalk. The fruiting portion of the smut appears usually on the tassel or the ear, although it may come out on any part of the stalk. At first it is a white mass, but turns black as the spores become ripe. When fully ripe the spore case breaks open and the spores are distributed.

Methods of preventing the spread of smut are unsatisfactory. Because of its peculiar method of attacking the plant, it cannot be controlled as are the other grain smuts. Dipping the seed in hot water or a corrosive sublimate solution, is of no avail, for the spores are not distributed by means of the seed grain. It has been suggested that the growing corn be sprayed with a fangicide about the time the spores germinate. This is expensive and impracticable. Possibly the best method s that of going through the field and cutting off the spore cases before they that are free from the vermin. Lies have ripened. Then at gathering time collect every but of smut that was missed the first time. Burn the smut excefully to prevent further informion. Now It Is "Bicycle Teeth".

It may be something possible to the eastern climate, to the doct of the eastern roads, or to some pocuharity about the eastern method of riding, but the fact remains that down Philadelphia way brexely refers are in sarge numbers off-cted by what dontists call "receding game," The offices of the dentists, according to a Pailadelphian's tale, ore overrus with wheelmen and wheelwomen who want to know what is the matter with their teeth, They complain tied they have more and more exposed ivory surface for every day that they live, and that unless some remaily is specifily found they will all either be fangtoothed or lose molars, increors and canines altogether.

The story goes that it took the dentist a long time to find out that the complaints come only from rillers of the wheel. They put two and two together, and have put a percuptury stop to the rolling of wheels in the Quaker City until they can evolve a remedy for bleyels froth. Dontists hugh at the story, and they say that there are no such things as breyele teeth in Philadelphia, and they add that they don't believe they rule fast enough in Philadelphia to injure any part of the austomy. Kansas City

Tallest Building in Gothan, It is said that in New York, on the site of the old International Hotel, Nos. 11 to 23 Park Row, the tallest building in Gotham is to be erected, It will be 386 feet high, twenty-six stories in the main and three in the towers. The weight of the structure is to be 52,000 tons. The front of the building will be peculiar by reason of the complete emsision of an incportant cornies. In the foundation, rules, seventy-five feet long, under water, will be united at the heat by a concreted floor three feet thick. The building will be furnished with diffeen elevators-nine from the first floor to the twenty-first, four express elevators to the twenty-six and two from the twenty-math to the twenty-nine.

To Cool the Atmosphere, A Western inventor recently putented a scheme by which he claims he can artificially cool a whole community at little expense. At certain intervals he would erect skeleton towers -like windmill towers-each having an electric trolley wire running from bottom to top. The wire transports peculiarly made bombs to the top, where they are exploded by electricity. The bombs contain liquified carboni acid gas, which, when liberated by the explosive, will instantly evaporate and severely chill the surrounding atmosphere.

What Rings Cost.

"Have you may blea of the price of the most costly ring ever made? asked Mrs. Watts, looking up from her paper from which she has been reading about jewels.

"Danno," answered Mr. Watte, "I know the one I put on your finger was relied in smut spores, then plant- plants massed together is very strik- has been costing me from \$2,000 to 8,2,509 a year ever since."

A Towel of Blotting Paper.

The most curious use to which paper is to be put is that suggested by the recent patenting of a blotting paper towel. It is a new style of bath towel, consisting of a full suit of heavy blot ting paper. A person upon stepping out of his morning tub has only to an ray himself in one of these suits, and in a second be will be as dry as a hone

Gladness Comes

With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the know-edge that so many forms of sicknes are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrapof Figs, promptly removes. That is why it is the only related with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which is act. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with the well-informed everywhere, Syrupof Figs stands highest an 's most largely need and gives most general satis' action.
