FOOD VALUE OF STRAWS

Buckwheat straw is never fell or, in-deed, used in any way, on account of a common projuitice against it, to the effect that it causes discusses of the skin. Its value as given in the scienskin. Its value as given in the scien-tific tables is forty cents for 100 pounds, ost straw being worth forty-five cents - New York Times.

PRUNING RASPBERUY CANES.

Prnne raspberry caces in the fall. Then the patch can be enliveded, or what is better, plowed out with a one horse plow, turning a furrow against the plant. This brings to the surface many insect larve, and thus cuts short land Former. their career, to the advantage of the frait grower. A farrow is left between the rows which facilitates drainage and puts the ground in better condition for early cultivating than if treat ed otherwise -American Agricultur

COBN AND SUNFLOWERS FOR SILASE.

These two may be put into the sile together and used as food for cows with much advantage. The leaves and heads of the sunformers alone are used. The stalks are only fit for fuel, for which they are excellent, and in places it pays to grow these flowers especial by for the fuel value of the stalk. The seeds in the heads contain fity per cent of their weight of a fine of co cellent for cows. The leaves are some what more nutritious than those of corn.

REARING PALL PROP.

It depends an circumstances which er or not it will pay to feed com-pigs over the winter. It depends, for one thing, on how they are ted. Use one tainly it won't pay to keep them, it's tainly it won't pay to keep them, it's growth is made at a very small cost on pasture, and the most growth is then made for the local used, it pays het fer, we may be sure, to test spring pigs, but a skulful feeder, heavy some roots or potatoes to spare for this use, with waste milk and brin or oatmoal, may make the feeding good profit, but it surely will not par to half feed them.

AND POR THE TOP.

As long as the highest prices are paid for the best, the most enterpris-ing farmers will spire neither pains for "Epense to produce the best, and if their neighbors local exert the m-selves to keep up tasy soon will find themselves in the background. Our strip of from farmers must keep abreast of the time. They must thus; they must real; they must study; they must er-perial; they must study; they must er-ber the fullest extent to drag ent even Mother Earth her ascrete of fortile. Let them do it and sho will reach them with fortile fields and good crop-jn abundance, and they will enjoy the richest bleesings of the most estic-ring and noblest occupation on earth The wills awake furner who has studied un agriculture can away be engelega P. The wide available further who have studied up agriculture can strays by the good as any other profession i man strays often much oction. For par-and fresh fruits, segulables, butter, eggs, and meat there is no one to do a peter with the farmer, -Practical transformation to active of an any other man-tering secure a large share of road that removed and the strays of r Farmer. ner.

COWS IN THE BASS.

A cow is nothing more nor lass that a machine used to manufacture the rough products of our farms into a condensed and firsued product, and condensed and finished product, and the solution finished product, and there address the finished product of the solution finished product of the solution for the solution for the solution of the solution o The dest point or monthing head is least must.
