Millions of Victims-Disposition of the Dead-A French Doctor's Remedy-Precautions in

This Country. AMINE is carrying off its millions of victims in India, and the plague is not only ravaging that land, but is beginning to cast its shadow over the world,

says the New York Journal.
In well-fed America we can hear of
the hungry millions with a pity not
numixed with satisfaction that we are otherwise. But no nation or class is above the fear of the plague germ. It can travel round the earth in a thousand different receptacles, is insensible to climate, and, attacking invisibly, brings wholesale death.

Plague and famine are co-operating in a way that must make the best efforts of officials and scientists seem hopeless. The irrigation tanks, very numerous in Northern India, have been reduced by drought to stagnant publies, and these have been con-verted by diseased men and animals into inexhaustible sources of conta-gion.
