CHAPTER XIII.
CONTINUED.

"The so," responded Bill, who felt that he had enlisted a keener and cleverer brain than his own in an attempt to solve the mystery, and was content to let him puzzle his wits over it, while he looked on with an air of reticence that hinted at a deeper knowledge of the matter than he felt willing to divulge.

"You say that you can't find that he was at anybody's home on the night when the horses were stolen—do you mean when you saw him going past your place?"

"No, sir," replied Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"Well, what do you think about it?" asked Wayne, apparently at a loss to know what to think, himself.

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

"I don't know," answered Bill, "I never took my eyes off the road. I know I saw him go past, but I don't know what he was doing."

reel. They've got their heads together now about every day. Bill comes up here a-looking as important as a turkey strutting, and every time he gets his foot down he seems to be saying 'I'm Bill Green, I be, an' Bill Green, he's some punkin, he is' and it makes me laugh to see him swell up something, when he says 'suthin', just like the turkey for all the world, when his 'suthin' is really 'suthin'. He 'an' his 'suthin' 'suthin', an' I know it, but I can't make out what his 'suthin' is."

"I don't know what their consultations are about," responded Dick, "and what's more, I don't care. I've got as much to do as I can get as it is."

"I don't know what their consultations are about," responded Dick, "and what's more, I don't care. I've got as much to do as I can get as it is."

"I don't know what their consultations are about," responded Dick, "and what's more, I don't care. I've got as much to do as I can get as it is."

AGRICULTURAL.

Wood Ashes For Cows.

In the early settlement of the country, when cows had access to newly cleared land with its burned and charred stumps, they used often to go to where stumps had been burned and lick up the charcoal. Many farmers believe that cows thus allowed free range were less liable to abortion than those kept in close stables. The ashes probably satisfied some want in the animal economy. It may have been the phosphates they contain which is required by the bones of the growing fetus. It was not too much the potash in the ashes corrects the acidity of their stomachs, which often results where stumps are highly fed in stables where it has little exercise.

Potash Salts on Manure Heap.

Almost all stable manure is deficient in potash. One of the best ways to remedy this defect is to enclose the manure while it is yet in the barnyard by putting German potash salts on the heap. This serves a double purpose. The salts will absorb ammonia which makes a stink of potash or sulphate. Superphosphate of lime may also be applied with benefit. That is largely composed of sulphate of lime or gypsum, and this has a strong affinity for ammonia, which it converts into sulphate of ammonia. If stable manures were always thus re-enforced with potash and phosphate their efficiency would be more than doubled. It is really the best way to use manure so that they will not revert to insoluble forms.

A Girl, Shell and Charcoal Box.

Shell and charcoal in granular form are necessary for the health and pro-

WOMAN'S WORLD.

Some Pretty Styles That Are Being Worn This Season.

The belt is no longer regarded as a very simple element in the wardrobe, to be associated only with the shirt waist and tailor suit, and thus easily disposed of in the selection of accessories. With the increasing popularity of styles which call for a pronounced accent in some form, either a single belt, girdle or sash, not only on afternoon dresses and fancy waists, but even on evening gowns and cloaks, it naturally comes in for a large share of attention. The consequence is a beautiful variety, designed to meet all costumes, large and various.

Beauty Clubs.

To name all the important honey-bearing plants would be impossible here, but the plants that furnish the bulk of the honey crop of this country are not numerous, and are generally well known. Perhaps the leader in both quantity and quality is the clover white clover. This usually comes into bloom about the first of June, and lasts until perhaps the middle of July. Six weeks of white clover honey flow is considered a good honey harvest of this plant, and apiculturists are very well satisfied if they get four weeks of a continuous flow of nectar from it. White clover honey is of the best quality, and commands the highest market price.

How to Handle Manure.

Manure which has been left in every respect. If we were, the whole of the article would be of little value, for it all had a shelter handy under which the manure could be thrown, it would be out of the way and where the fertilizing elements could be preserved until the time came when it could be drawn out on the fields and spread at once.

A Handy Box for Fowl. An excellent box for applying there is shown in this illustration. It is self-lubricating, but the greasing or waxy netting over the front keeps the fowl from throwing the manure out with their bills, and thus wasting it. Kept before them in this way the hens need never be out of the necessary articles.

How to Handle Manure.

Comparatively few farmers are situated as we would wish to be in every respect. If we were, the whole of the article would be of little value, for it all had a shelter handy under which the manure could be thrown, it would be out of the way and where the fertilizing elements could be preserved until the time came when it could be drawn out on the fields and spread at once.

A Better For Storing Plants.

Nearly every one tries to start a few plants early in the spring in hot houses, and requires a world of labor in the arrangement, carrying them from window to window, and so on, to keep them from freezing and overheating.

Warm Food For Pigs.

No better proof of the benefit to be derived from the use of warm food for pigs can be put forward than the appearance and tone of the animals themselves. The body used pig, as I put it, has a skin which is hard to the touch and possesses a singularly flatulent aspect. The well-treated animal, on the other hand, has a soft, well-kept coat, which the eye looks to be moist. One denotes a "slow doer," the other means "early maturity."
