Items of Interest

Middleboro, Mass., was one of the sarliest New England towns to engage in the experiment of municipal light-ing, and it claims to have made the venture a success, but only after years of foundering and trouble. The town was forced in a burchase of a plant was forced into the purchase of a plant that was the consolidation of two pri-That was the consolidation of two per-vate corporations, heavily capitalized. It was necessary to buy out this com-pany to avoid hitigation coming out of loose franchise granting, and to pay a large price. Starting with this handl-rap, says the New York Evening Post, and owing is accommental managing. and owing to experiemental managing. and owing to experimental managing, the balance river for years indicated that the attempt was a failure. Then came new and improved management, and now it is anonained that the rev-enue from light sold to private con-sumers exceeds the appropriations by the town to cover the cost of street lighting. So large is the semand for commencing lighting that some of the commercial lighting that some of the streets lights have been shut off tem-porarily, it being considered wise to cater to the revenue-hearing side of the business. the husiness.

Trade has received a robuff in Lon-don society, says the Boston Herald; not because it is trade, but because sil-ly women, who should be about better selves on top. The exposure will, beyond doubt, give the chicks colds and from that

It is so than cutting under legitimate to despect are selling their titles and positions by opening shops and ten places after this manner of Lady de Gray. It is mothing rather than a prainwearing step for the wile of a peer to take. Through her own extravagant follies, she or her creditors deem. It justifiable, but her sovereign Hege thinks otherwise of the matter, and will refuse to receive her ladyship at Court when she becomes a "shopkeep-er". The royal robuke is intended as much for the handrome countess's debts as to worm other speakthriffs to ins than cutting under legitimate debts as to worm other spendthrifts to follow not her example of bartering rank. It is very uncertain, therefore, if Lady de Gruy now believes she will make a fortune selling tea at a guinea the cup.

About three years ago the Christian Common wealth Colony was founded in Muscogee County, Georgia, a few miles from Columions, by furty men and wo-men, with some childron, from Ohio, men, with some children, from Ohio, They were an exceptionally intelligent and worthy body of people Plain cot-tage, were built and a common din-ing hall, which was also used for re-ligious service, was exclusibled. The first year was a prosperous one. Four crops were railed and good prices se-cured for the products. A saw mill was built, a grist mill and a broom factory were products of saw mill was built, a grist mill and a broom factory were products of a way mill was built, a grist mill and a broom factory were products of a saw mill was built, a grist mill and builte needed, but afforded a surplus for the mar-ket. Then new members came and trouble legan. Many shicked their work, grasip and s and a became rife, debts were incurred which there was debts were incurred which there was no money to meet, and now it is an-nonced that the colony has gone to **卫1**世代秋雨,

Well founded complaints are heard on bil soles, says the New York Trib-une, that the great Consolidated Gas with its vnst wealth. and Company, with its visit weath and insignificant resources, is supporting a poor quality of gas. New Yorkers are paying \$105 a to channel feet for gas which can be mainfertured for 60 cents a lisurand at a kind-one profit, when no value of the hy-products is considered. Even the ice monoicly is not new so exactlorities as the gas monoicle. noniopols.

Points on Hog Cholera. Dr. D. F. Luckey, State Veterinarian ( Missouri, has issued a report of hog cholera. He sums up the result of his investigation as follows: "At present all the advice that can be given is to burn the bodies of the

cholera hogs. Use a little common sense about bringing the cholera on your place. If you really think you need the cholera among your hers take a little time some day to go over to your neighbors who have it, wall around among the sick logs for awhile; go back home and trainp around your own bogs, and you can go to bed that night feeling reasonally e that in a few days you hogs will ve the cholera. If this should failand it seldoni does-wait till you hear of a neighbor who lives up the creck from you losing some hogs with chols era and throwing their carcasses in or near the creek. Then, as soon as the germs have time to wash down by your phase, get all your hors together and drive them to the creek for a

drink. If the weather is warm the hogs will generally go to the creek without being driven, thereby saving ir owners a great deal of worry and exertion "If this fails, try keeping a node-

count dog that runs all over the country at night. If you will let him alone try at ment. It you win to find some-long enough he is sure to find some-where a piece of hog that had died about a year before with the hag "day kelse" and "contrast" sysabout six inches deep, and the doe, for a more lack of any other pastime cratches it up. However, feeling a delicacy about the propriety of dep ting his bone upon the front porch, he generally goes out to the hog pen togenerally goes out to the dig to cover fluid a place to get some dirt to cover it up about one inch deep. The hegs, it up about one inch deep. The hegs, course, do not bother the doc's ment. Anyway, from now on when your hogs die of cholera, burn them." In conclusion, Dr. Luckey says that some very encouraging results have been obtained by recent experiments Missouri in vacelnating hegagainst cholera. The results will be published in a builetin soon to be is straL.

Facility in Hanging Hoge

The hardest work about butchering is linnging the hogs unless one has something that will lighten the labor. The device shown in the illustration is very satisfactory, and can be made at very little expense.
