

At the session of nearly every Legislature the revenue and machinery bills are not passed until near the end, when there is either a rash of business that they do not then receive the careful consideration which their importance demands. This Legislature seems determined to do better in this respect than its predecessors. As soon as the Finance Committee of the Senate and House were appointed they promptly held a conference and laid an interchange of views and opinions as to the best way of raising more revenue without increasing the rate of taxation. It was decided by these two committees to appoint a sub-committee to consider and formulate a plan and proposed a committee and machinery act. On this subject were appointed Senators Gaudin, of Chatham, and King of Forsyth, and Representatives W. W. Willard of New Hanover, Page of Montgomery and Childs of Mecklenburg. This committee have gone to work in a business-like way, reducing the number of the work assigned to the committee and have been holding an hour-long night and day session. They have held several public hearings and have held a number of public hearings. They have held a number of public hearings and have held a number of public hearings.

QUEEN Victoria died last Tuesday, aged 81 years, after a reign of nearly 64 years, which was the longest of any English monarch. She was a remarkable woman, and besides being beloved by her four hundred million subjects she was admired by the people of every country. Her successor is her eldest son, aged 59 years.
