Congressman Atwater secured more rural mail delivery routes than any other Congressman from this State. His success, from 1 to 10,000, is due to all his constituents, and to the fact that he has established many other routes.

These rural delivery routes are a great convenience to the people residing near them, and we wish that several could be established in Chatham, but it is impossible.

Why? Because none can be established where there is no good road, and as Chatham has no good road we cannot expect a rural mail delivery route until we "mend our ways."
