

# Bad Coughs

"I had a bad cough for six weeks and could find no relief until I tried Ayer's Cherry Pectoral. Only one-fourth of the bottle cured me."

Neglected colds always lead to something serious. They run into chronic bronchitis, pneumonia, asthma, or consumption. Don't wait, but take Ayer's Cherry Pectoral just as soon as your cough begins. A few doses will cure you then.

Three sizes: 25c, 50c, \$1.00. All druggists.

# CURE BLOOD POISON, CANCER, Aching Bones, Shifting Pains, Itching Skin, Pimples, Etc.

If you have Pimples or Offensive Eruptions, Scurvy, or other Blood Disorders, or if you are afflicted with Aching Bones, Shifting Pains, Itching Skin, Pimples, Etc., you should use Dr. Williams' Pink Pills for Pale People. This medicine is a blood purifier and a blood tonic. It will cure you of all these ailments, and it will also give you a healthy, glowing complexion. It is the best medicine for all blood disorders.

# SOUTHERN FARM NOTES

TOPICS OF INTEREST TO THE PLANTER, STOCKMAN AND TRUCK GROWER.

Improving Breeds for Dairy Cows. We have already published much on the importance of the sire and dam, and the importance of a sanitary system by the dairyman of a recent bulletin of the Tennessee Experiment Station. This bulletin treats upon the following subjects: "The Relative Value of Protein in Good and Poor Cow Milk and What It Means."

We have not the room to give all the details of this interesting and important question, and so will only summarize the conclusions of the experiment.

These experiments show that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Secondly, only about half as much fat is contained in the milk of a cow which has a high protein content as in the milk of a cow which has a low protein content.

Thirdly - The smallest amount of total solids in the milk of a cow which has a high protein content is 48.5 per cent, in which the fat content is 10.5 per cent. This is a very high quality of milk.

Fourthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Fifthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Sixthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Seventhly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Eighthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Ninthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Tenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Eleventhly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twelfthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Thirteenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Fourteenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Fifteenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Sixteenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Seventeenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Eighteenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Nineteenthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twentiethly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twenty-firstly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twenty-secondly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twenty-thirdly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twenty-fourthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

Twenty-fifthly - The milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content. It is also shown that the milk of a cow which has a high protein content is of a higher quality than that of a cow which has a low protein content.

# A PROMINENT CHURCH WORKER SAYS SHE OWES HER LIFE TO PE-RU-NA.

Mrs. Hattie LaFontaine

## HER GREAT FORTUNE

A Woman Saved From Life-Long Misery and Made Happy and Useful.

A woman confined to the house for several years with a chronic female derangement had finally given up hope of being cured.

She had tried physician after physician, and remedy after remedy, without any permanent improvement.

Her treatment cost her husband who was a poor man hundreds of dollars. They had been obliged to deny themselves many comforts of life in order to get money enough to pay the physicians.

The woman had become weak, nervous and wretched, and scarcely able to keep out of her bed. Her children were growing up neglected and ragged, because of the want of a mother's care. Her husband was becoming discouraged and broken down with overwork.

During the winter one day she happened to read an item which contained the news that Dr. Hartman would treat such cases free of charge by letter. She immediately wrote the doctor describing her case, and giving him all her symptoms.

She soon received a letter telling her exactly what to do, and what medicine to use, and she began to feel better. The treatment the physician would treat such cases free of charge by letter. She immediately wrote the doctor describing her case, and giving him all her symptoms.

Three months ago I was troubled with a chronic female derangement, and I was confined to the house for several years. I had tried physician after physician, and remedy after remedy, without any permanent improvement.

My name is Hattie LaFontaine, and I am a native of New York. I was born on the 15th of January, 1845. I was educated in the common schools of my native State, and I am now residing in New York City.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

I have never before seen any other medicine which has cured me of my chronic female derangement. I have never before seen any other medicine which has cured me of my chronic female derangement.

"After my first child was born I suffered for several months with a chronic female derangement, and I was confined to the house for several years. I had tried physician after physician, and remedy after remedy, without any permanent improvement.

And Alveator, who presides over the operations of the Alveator commission, once charged a wealthy client \$5,000 for a few pages of written advice. The client vented to suggest that this was rather a high price for half a day's work. "It is half a day's work," said his lordship. "It is part of my whole education. All my years at the temple, all the years I have practiced, all the years of my experience, it is half a day out of the heart of my life."

Among those men who have been brought into prominence by the railway boom of the past few years, President Bert of the Union Pacific, takes front rank. The assy of his success lies in his extraordinary working capacity and his intimate knowledge of railroad duties. Every detail connected with the railway business flows through his hands, and he knows nothing of automobiles, even the highest subordinate officials being mere factotums.

# CAPUDINE CURES ALL HEADACHES

Machine to Sew Up Wounds. A wound stitching machine is the invention of a doctor named Mielch. It works very much more rapidly than the old method of stitching by hand, is painless and effective.

Trivial Overnight that Wrecked a Promising Life. Half a century ago a young Englishman, while traveling, met a beautiful girl and promptly fell in love with her. A few days later he returned home, and his first act was to write her a love letter. In it he told her that he could not be happy without her and that she regarded his proposal favorably he would expect a reply by the next mail.

To this letter he received no answer and so disappointed he was that from that time until his death, which occurred recently, he shut himself up in his home and lived like a hermit. Most of his time was spent in reading, and the day after his funeral the heirs began to search the books in his library for they thought it quite possible that the eccentric old man might have hidden some bank notes in them.

They found none, but in a tattered old pamphlet they found another kind of note, the love letter which was written fifty years ago, and which the writer had forgotten to mail.
