Reeping Roads in Order

Recepting Boards in Order.
One of the essentials his keeping a road in require is to be set it well rounded to allow the water to rais of after such rain. This is necessibled by running a grader over the road. As seen as the newly crushed shows arrunched the grader is run along each puriced the grader is run along each water and sill tones stones are thrown been into the road. Again before septing the road is gone over, and all loose stones thrown into the road, and the two ridges between the centre and the wheel traces are rule of not thrown into the law place in the centre that has been wore by the one horse traveling in the middle of the road. The grader is used at least one each year centring off all that places not filling in the depressions. The road filling in the depressions. The road to stern, and at it it the erow thought will now pick and coment together and make a round as smooth and easy to arraved exert as a floor. This piece or road has been an admired seven to the come to the come to the come to stern, and at it it the erow thought the visco had a fruit as even had not not been an admired seven to leak regions. An examination was ready to the come to the come to leak regions, the committee of the come to leak regions. An examination was to leak regions of this road execution of the come to leak regions. The building of this road exet.

we should exercify use as much as one pound of the beef or dried blood, which has nearly the same markets of markets of grain feed. One pound to five quarts of grain would be more nearly necording to set usual practice, but perhaps this neight to restlaidly at from any cause to eight mouths necording to set usual practice, but perhaps this neight to restlaidly increased.

Practical sho switting.

Practical sho switting.

The average farmer can build a slie with but very little outly. It can be practically done by himself and his farm laborer, and if the lumber is growing on his own fant the cast expense will be very small. A rest expense will be very small. A rest expense will be very small. A rest expense of this surples of the same practically done will be under the cast expense of the same cannot with each of your care and trouble.

The good strains of begs must be produced.

An Interesting Decision.

An interesting decision was recently handed down by the Supreme Court in Connects at in the matter of a new highway laid out by the Rabroad Conhighway and sait by the Ramona com-missioners of the towns of Meriden and Chrishire to avoid the grade cross-ing near though's Mills. The suit wa-brought to compel the Schermen of the town of Meriden to make neces-sary repairs to the new highway. The Schedmen, however, chimned that the highway was not properly construct ed. The wood was constructed by the Meriden and Waterbury Radiood Company and approved by the Raircoal Commission, in spite of the opposition of the town of Meriden. The decision is regarded of special importance, as it establishes the right of mine all com-missioners to change the lines of ex-terior backers, and establish new tsting highways and establish new
